Urban Geopolitics Jonathan Rokem, Camillo Boano, 2017-08-21 In the last decade a new wave of urban research has emerged putting comparative perspectives back on the urban studies agenda However this research is frequently based on similar case studies on a few selected cities in America and Europe and all too often focus on the abstract city level with marginal attention given to particular local contexts Moving away from loosely defined urban theories and contexts this book argues it is time to start learning from and compare across different contested cities It questions the long standing Euro centric academic knowledge production that is prevalent in urban studies and planning research This book brings together a diverse range of international case studies from Latin America South and South East Asia Eastern Europe Africa and the Middle East to offer an in depth understanding of the worldwide contested nature of cities in a wide range of local contexts It suggests an urban ontology that moves beyond the urban West and North as well as adding a comparative relational understanding of the contested nature that Southern cities are developing This timely contribution is essential reading for those working in the fields of human geography urban studies planning politics area studies and sociology

Bagaeen and Uduku's previous edited publication *Gated Communities* Routledge 2010 and relates recent events to trends in urban research showing how the discussion has moved from privatised to newly collectivised spaces which have been the focal point for events such as the Occupy London movement and the Arab Spring. City of Song Michael A. Figueroa, 2022. Modern Jerusalem, a city central to Jewish, Muslim and Christian religious imaginaries and the political epicenter of the Israeli-Palestinian crisis, is to put it mildly a highly contested space. More surprising perhaps is that its musical landscape not only reflects these rifts but also helped to define them as the ancient city transitioned to modernity during the twentieth century. In *City of Song: Music and the Making of Modern Jerusalem*, author Michael A. Figueroa argues that musical renderings of Jerusalem have been critical to the formation of Israeli political consciousness. The book demonstrates how Israeli songwriters helped to shape their public's territorial imagination, creating images of a city at once heavenly and earthly that dwells in longing that must not be forgotten, that compels one to bereave the dead, that represents the fulfilment of prophecy and that is the site of immense cultural diversity. The dynamic history of its representation in lyrics and music helps dispel any notion that the Israeli-Palestinian crisis is timeless, intractable and based on static essential identities while there are continuities across historical divides. Radical change constantly transpires. *City of Song* combines analyses of musical meaning, political discourse and public performance over the long twentieth century, 1880s-2010, to reveal how the Israeli-Palestinian crisis, territorial fixation on Jerusalem, has been constructed historically contingent and subject to artistic intervention in modernity. Through a musical history of Jerusalem, Figueroa introduces a novel humanities-centered approach to one of the world's most contested cities and one of the defining cultural and political questions of our era. [Introduction to Cities](#) Xiangming Chen, Anthony M. Orum, Krista E. Paulsen, 2018-02-23

The revised and updated second edition of *Introduction to Cities* explores why cities are such a vital part of the human experience and how they shape our everyday lives. Written in engaging and accessible terms, *Introduction to Cities* examines the study of cities through two central concepts: that cities are places where people live, form communities and establish their own identities; and that they are spaces such as the inner city and the suburb that offer a way to configure and shape the material world and natural environment. *Introduction to Cities* covers the theory of cities from an historical perspective right through to the most recent theoretical developments. The authors offer a balanced account of life in cities and explore both positive and negative themes. In addition, the text takes a global approach with examples ranging from Berlin and Chicago to Shanghai and Mumbai. The book is extensively illustrated with updated maps, charts, tables and photographs. This new edition also includes a new section on urban planning as well as new chapters on cities as contested spaces, exploring power and

politics in an urban context It contains information on the status of poor and marginalized groups and the impact of neoliberal policies material on gender and sexuality and presents a greater range of geographies with more attention to European Latin American and African cities Revised and updated Introduction to Cities provides a complete introduction to the history evolution and future of our modern cities

Nationalism and the Haram al-Sharif/Temple Mount Erik Freas,2017-07-12 This book examines the manner in which the Haram al Sharif Temple Mount has been appropriated by both Palestinians and Israelis as a nationalist symbol legitimizing respective claims to the land From the late

nineteenth century onward the site's significance became reconfigured within the context of modern nationalist discourses yet despite the originally secular nature of Palestinian and Israeli nationalisms the holy site's importance to Islam and Judaism respectively has gradually altered the character of both in a manner blurring the line between religious and national identities

Neoliberal Apartheid Andy Clarno, 2017-03-07 In recent years as peace between Israelis and Palestinians has remained cruelly elusive scholars and activists have increasingly turned to South African history and politics to make sense of the situation In the early 1990s both South Africa and Israel began negotiating with their colonized populations South Africans saw results the state was democratized and black South Africans gained formal legal equality Palestinians on the other hand won neither freedom nor equality and today Israel remains a settler colonial state Despite these different outcomes the transitions of the last twenty years have produced surprisingly similar socioeconomic changes in both regions growing inequality racialized poverty and advanced strategies for securing the powerful and policing the racialized poor Neoliberal Apartheid explores this paradox through an analysis of de colonization and neoliberal racial capitalism After a decade of research in the Johannesburg and Jerusalem regions Andy Clarno presents here a detailed ethnographic study of the precariousness of the poor in Alexandra township the dynamics of colonization and enclosure in Bethlehem the growth of fortress suburbs and private security in Johannesburg and the regime of security coordination between the Israeli military and the Palestinian Authority in the West Bank The first comparative study of the changes in these two areas since the early 1990s the book addresses the limitations of liberation in South Africa highlights the impact of neoliberal restructuring in Palestine and argues that a new form of neoliberal apartheid has emerged in both contexts

Shaping Jerusalem Francesco Chiodelli, 2016-10-14 Shaping Jerusalem Spatial planning politics and the conflict focuses on a hidden facet of the Israeli Palestinian conflict the relentless reshaping of the Holy City by the Israeli authorities through urban policies spatial plans infrastructural and architectural projects land use and building regulations From a political point of view the Israeli Palestinian conflict may appear to be at an impasse however it is precisely by looking at the city's physical space that one can perceive that a war of cement and stone is under way Many books have been written on the Israeli Palestinian conflict over Jerusalem some of them have focused on the urban fabric Shaping Jerusalem uniquely discusses the role of Israeli spatial actions within the conflict It argues that Israel's main political objective control over the whole city is ordinarily and silently pursued through physical devices which permanently modify the territory and the urban fabric Relying on strong empirical evidence and data through the analysis of statistical data official policies urban projects and laws author Francesco Chiodelli substantiates the political discussion with facts and figures about the current territorial situation of the city and about the Israeli policies implemented in the city in the past six decades

European Diplomacy in Practice Federica Bicchieri, Niklas Bremberg, 2018-12-07 This book aims to show practice approaches at work in the fields of European diplomacy and security, broadly conceived. It sets out to provide readers with a hands-on sense of where research on social practices and European diplomacy, security, and foreign policy currently stands. The book reviews how practice approaches have evolved in International Relations (IR) and brings together a unique set of contributions which highlights how insights from practice approaches can be applied to advance research on a number of key issues in these fields. While the debate about practices in IR goes beyond the case of diplomacy, the latter has become a showcase for the former, and this book continues the debate on practices and diplomacy by zooming in on the European Union. Examples of issues covered include the evolution of EU-NATO relations seen from the perspective of communities of practice, burden sharing as an anchoring practice for European states, involvement in crisis management operations, the practical knowledge shaping the EU's responses to the Arab Uprisings, agency as accomplished in and through EU counter-piracy practices, and the political resistance to Israeli occupation and the non-official recognition of Palestine performed by EU diplomats. Thus, by focusing on specific practices and analytical mechanisms that contribute to understand the transformations of European diplomacy, security, and foreign policy, this book provides essential readings to anyone interested in innovative ways to grasp the contemporary challenges that face the EU and its member states. The chapters, originally published as a special issue of *European Security*.
