Italy, 1954 **Italy. History, Art, Landscape. (Second English Edition.) [With Illustrations.].** Italy, 1957

History of the Italian Agricultural Landscape Emilio Sereni, 2014-07-14 Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context from antiquity to the mid twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication, it was a pathbreaking work parallel in its importance for Italy to Marc Bloch's masterwork of 1931, *The Original Characteristics of French Rural History*. Sereni invented the concept of the historical agricultural landscape, an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Landscape and the Arts in Early Modern Italy Katrina Grant, 2025-10-01 *Landscape and the Arts in Early Modern Italy: Theatre, Gardens, and Visual Culture* argues that theatre and the new genre of opera in particular played a key role in creating a new vision of landscape during the long seventeenth century in Italy. It explores how the idea of gardens as theatres emerged at the same time as opera was developed in Italian courts around the turn of the seventeenth century. During this period, landscape painting emerged as a genre, and the aesthetic of designed landscapes and gardens was wholly transformed, which resulted in a reconceptualization of the relationship between humans and landscape. The importance of theatre as a key cultural expression in Italy is widely recognised, but the visual culture of theatre and its relationship to the broader artistic culture is still being untangled. This book argues that the combination of narratives playing out in natural settings, Arcadia, Parnassus, Alcina, the emotional responses elicited by sets and special effects, the apparent magical manipulation of the laws of nature, and the way that garden theatres were used for displays of power and to enact princely virtue and social order all contributed to this shifting idea of landscape in the seventeenth century.

History of the Italian Forest Landscape Mauro Agnoletti, 2025-05-11 The book explain the history of the italian forest landscape from preroman times to the present The aim is to demonstrate that all the Italian forest have been shaped by human activities

through the centuries and they are an important component of the Italian cultural landscape. The content explores case studies from the north to the south of Italy explaining how human activities shaped extension, density, species composition and structure of the forests in order to meet the need of the society as well as influencing their ecological features. Timber, fuel, wood, charcoal production as well as shipbuilding are taken into consideration but also forest managed for food production eg Chestnut forests, wood pastures, pine forests. Cases such as Venice and the silviculture developed by monasteries are described. The history of the afforestation made by the Italian state in response to climate crisis is also considered as well as case studies related to specific management forms as those related to fires. Management methods such as high stand and coppice are explained addressing also the many different traditional practices adopted by the local populations: selective cutting, pollarding, shredding etc. The book also shows how forests have doubled their extension since the second world war on abandoned farmed land.

Landscape and History since 1500 Ian D. Whyte, 2004-03-03

Landscape and History explores a complex relationship over the past five centuries. The book is international and interdisciplinary in scope drawing on material from social, economic and cultural history as well as from geography, archaeology, cultural geography, planning and landscape history. In recent years as the author points out there has been increasing interest in and concern for many aspects of landscape within British, European and wider contexts. This has included the study of the history, development and changes in our perception of landscape as well as research into the links between past landscapes and political ideologies, economic and social structures, cartography, art and literature. There is also considerable concern at present with the need to evaluate and classify historic landscapes and to develop policies for their conservation and management in relation to their scenic heritage and recreational value. This is manifest not only in the designation of particularly valued areas with enhanced protection from planning developments such as national parks and world heritage sites but in the countryside more generally. Further Ian D Whyte argues changes in European Union policies relating to agriculture with a greater concern for the protection and sustainable management of rural landscapes are likely to be of major importance in relation to the themes of continuity and change in the landscapes of Britain and Europe.
