The remaining chapters present engaging case studies suitable for class discussion. These include Roman emperors, Reformation propaganda, the Founding Fathers, defamation in US politics, women politicians, autocratic regimes, European leaders, celebrities, nations, Internet campaigns. This handbook will prove invaluable to undergraduate and postgraduate students in communication, political science, history, sociology, and psychology departments. It will also help researchers become independent, critical, and informed thinkers capable of avoiding the pressure and manipulations of the media.

Communication Strategies in Turkey
Taner Dogan, 2020-12-10
The Turkish President Recep Tayyip Erdogan is known for his populist Islamist ideology, charismatic personality, and for ushering in new forms of communication strategies in Turkey. The key tools in Erdogan's political communication repertoire include religious, cultural, and historic symbols and imagery. From engaging Israel to the Gezi Park protests, from the Arab uprisings to the July 2016 coup attempt, every key moment in Turkey's recent history has heralded a change in Erdogan's rhetoric. *Communication Strategies in Turkey* examines the transformation of political messaging that has taken place within the Justice and Development Party (AKP) under Erdogan. Using quantitative and qualitative analysis of in-depth interviews with high-profile AKP officials, observations at AKP rallies and headquarters, and analysis of Erdogan's speeches from 2002 to 2019, the book shows how his method of communication changed over time to prioritize a New Turkey to replace Atatürk and his legacy.

Media and Politics in a Globalizing World
Alexa Robertson, 2015-03-17
Globalization and technological advances have had a dramatic impact on the relationship between media and politics. How can we understand the connection between the two in the present day? Alexa Robertson argues that we cannot understand the power of the one without taking the other into account. This exciting and accessible book provides fresh insight into our contemporary media landscape, adopting a truly comparative global approach. In *Media and Politics in a Globalizing World*, Robertson encourages the reader to explore the relationship from different perspectives: those of the politician, the journalist, the activist, and the ordinary citizen, and how the relationship between media and politics varies across cultures. Illustrated with contemporary examples throughout, the book weighs up arguments for seeing new developments in terms of change or continuity, as empowering or debilitating, and as promoting or undermining democracy. Suitable for undergraduates and postgraduates studying politics, media, and sociology, it also will be of interest to the general reader wishing to understand the

complex role of the media in political life the world over For additional support and information visit this book's companion website at <http://mediapolitics.net>

The SAGE Encyclopedia of Quality and the Service Economy Su Mi Dahlgaard-Park, 2015-05-29 Society globally has entered into what might be called the service economy Services now constitute the largest share of GDP in most countries and provide the major source of employment in both developed and developing countries Services permeate all aspects of people's lives and are becoming inseparable from most aspects of economic activity Quality management has been a dominating managerial practice since World War II With quality management initially associated with manufacturing industries one might assume the relevance of quality management might decrease with the emergence of the service economy To the contrary the emergence of the service economy strengthened the importance of quality issues which no longer are associated only with manufacturing industries but are increasingly applied in all service sectors as well Today we talk not only about product or service quality

but have even expanded the framework of quality to quality of life and quality of environment. Thus quality and services have emerged in parallel as closely interrelated fields. The Encyclopedia of Quality and the Service Economy explores such relevant questions as: What are the characteristics, nature and definitions of quality and services? How do we define quality of products, quality of services or quality of life? How are services distinguished from goods? How do we measure various aspects of quality and services? How can products and service quality be managed most effectively and efficiently? What is the role of customers in creation of values? These questions and more are explored within the pages of this two volume A to Z reference work.
