idea and main task of photogrammetry If you want to measure the size of an object let s say the length width and height of a
house then normally you will carry this out directly at the object Now imagine that the house didn t exist anymore it was
destroyed but some historic photos exist Then if you can determine the scale of the photos it must be pos ble to get the
desired data Of course you can use photos to get information about objects This kind of formation is different So for example
you may receive qualitative data the house seems to be old the walls are coloured light yellow from photo interpre tion or
quantitative data like mentioned before the house has a base size of 8 by 6 meters from photo measurement or information in
addition to your background knowledge the house has elements of the art nouveau style so may be c th structed at the
