The Responsible Leader Ed Forst, 2009 Why are there so many books written about effective leadership today Due to negative attitudes and thought patters our current society is producing poor leaders who are leading the society to self destruction The messages being communicating to leaders are creating people who are attracting greed selffishness and the opposite behaviors needed to be effective Leaders in all areas of society like parents coaches teachers administrators and managers all must re examine their dominating thoughts about leadership if they want to achieve their goals Because of the law of attraction the leader s dominating thoughts will determine his her level of success The most dominating thought that a leader must possess is faith Faith in God in your abilities and other people abilities is the key to success Leadership behaviors whether it is motivating others setting goals hiring or firing empolyees is contingent upon a leader s level of faith Along with discussing why society is currently failing to reinforce faith this book provides practical solutions that leaders can use to improve their effectiveness A model of leadership is presented in which the leader s dominating thoughts influence the behaviors that produce the result that the leader was thinking about positive or negative The key for the leader is to examine those thoughts to make sure they are positive faith thoughts about your creator your abilities and other people

UXO Team Leadership George J. DeMetropolis, 2003 The primary purpose of this study was to provide an analysis of the effectiveness of leadership through the interpersonal relationship between a team leader and a team This research paper attempted to define how leaders create and handle effective teams Specifically this study

was focused on UXO teams in a UXO environment performing a UXO clearance project still in progress. It was the aim of this study to provide information that will be beneficial to team leaders and will contribute to improvement of UXO team leadership techniques. The findings identified in this study provide some empirical support and insight into the strengths and weaknesses found in one case study. The findings revealed positive correlation in many of the researched areas within each hypothesis in the relationships and perceptions between team leaders and team members. However, the findings also indicated considerable negative correlation within one of the dimensions, the demonstration of sufficient technical know-how, which was actually expected to be one of the strongest. Overall, it is concluded that this research has made an important contribution towards defining how a leader creates and handles an effective unexploded ordnance team. The findings of this study should be beneficial to team leaders and contribute to improvement of UXO team leadership techniques.

Leaders' Digest J. Edwin Dietel, 1996. The Air Force Comptroller, 1992. 12 Winning Leadership Qualities New Thrive Learning Institute, 2016-03-11. You have what it takes. You know you are the most suited person for the job. You're so positive that you can lead a lot of people towards good business. Or so you think. Because if you really are, then why did John from the other department get the job you've been dying to have since you entered the company? Leadership is more than just being confident that you can manage a number of people and make them follow your lead. Each one of us influences at least ten thousand other people during our lifetime. Hence the question is not whether we can influence these people but in what manner shall we influence them. There are instances that competitors suddenly give up believing that they just can never be leaders. Maybe I'm not really born to lead, they think. On the contrary, the key to effective leadership does not depend primarily in the abilities we are born with but in techniques, skills, character and qualities that we are open to develop throughout life.
