The Nature of Order, Book One: The Phenomenon of Life Christopher Alexander,2020-03-30 Christopher Alexander's series of ground breaking books including A Pattern Language and The Timeless Way of Building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in The Nature of Order Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities In The Phenomenon of Life the first volume in this four volume masterwork Alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture With this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region He introduces the concept of living structure basing it upon his theories of centers and of wholeness and defines the fifteen properties from which according to his observations all wholeness is built Alexander argues that living structure is at once both personal and structural Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united *Environmental Decision-Making in Context* Chad J. McGuire,2017-09-25 Because of the complexity involved in understanding the environment the choices made about environmental issues are often incomplete In a perfect world those who make environmental decisions would be armed with a foundation about the broad range of issues at stake when making such decisions Offering a simple but comprehensive understanding of the critical roles science economics and values play in making informed environmental decisions *Environmental Decision Making in Context* A Toolbox provides that foundation The author highlights a primary set of intellectual tools from different disciplines and places them into an environmental context through the use of case study examples The case studies are designed to stimulate the analytical reasoning required to employ environmental decision making and ultimately help in establishing a framework for pursuing and solving environmental questions issues and problems They create a framework individuals from various backgrounds can use to both identify and analyze environmental

issues in the context of everyday environmental problems The book strikes a balance between being a tightly bound academic text and a loosely defined set of principles It takes you beyond the traditional pillars of academic discipline to supply an understanding of the fundamental aspects of what is actually involved in making environmental decisions and building a set of skills for making those decisions

Making Life Rich Without Any Money Phil Callaway, 2009-10-01 In a time when readers have experienced the transitory nature of the economy Phil Callaway shares fascinating characteristics of truly rich people characteristics that have nothing to do with money and everything to do with wealth Readers will nod their heads knowingly smile and sometimes laugh out loud as they read about The perils and joys of a SITCOM family Single Income Three Children Oppressive Mortgage Phil's new appreciation for his wife after a memorable Mr Mom experience One family's surprising response when they are literally creamed by a dairy truck A lasting male friendship forged over an unlikely object a lawnmower A startling phone call that changed Phil's life True wealth doesn't come with any material possessions Through warmth and laughter Callaway shows that the best things in life are not really things after all In this tough economic climate readers may be surprised to learn that they may find real richness even in their own backyards

Making Life Better James VanDenBurg, 2011-09 Oliver Wendell Holmes Jr once said A mind stretched by a new idea can never go back to its original dimensions For a control freak like myself this is no small matter Making Life Better is an invitation to own our part of our making and embrace our unique opportunities to make our lives better It's about making routine and daily choices of action reaction thought and feeling more profoundly connected to who we are what we desire and what's most important to us It's an invitation to turn off our auto pilot setting and allow our sense of purpose identity and direction to break into our lives with greater wisdom clarity and intention It's a recognition that a meaningful fulfilling and happy life is really nothing more though certainly nothing less than a very long series of meaningful fulfilling and happy moments How we experience each of those moments is always completely within us
