Color Protocols Carolyn L. Kane,Lida Zeitlin-Wu,2025-09-30 An edited volume that explores how color intersects with problematic histories of racial encoding in linguistic visual and algorithmic media What is at stake when categories like color race and ethnicity are transformed into a common language lexicon or industry standard And more critically how can we avoid the epistemic and ontological violence that seems inevitable in organizing color into a series of grammars syntaxes indexes and protocols Color Protocols offers a series of responses to these questions and others It begins with the premise that color is central to the history of systemic racism and in turn that the encoding of race vis vis color is an intrinsic aspect of chromatic technologies The book s eighteen curated essays edited by Carolyn Kane and Lida Zeitlin Wu are written by scholars from across the arts social sciences and humanities Each section contains both original essays and republished excerpts fundamental to understanding how the history of color technology and its racialized double valences have played out across multiple fields and media platforms over the last century and a half Contributors Ruha Benjamin Jianqing Chen Anne Anlin Cheng Frederick Douglass W E B Du Bois Richard Dyer Ali Feser Nicholas Gaskill Quran M Karriem Michael Keevak Lisa Nakamura Tina Post Aileen Robinson Michael Rossi Lorna Roth Amber Sweat Genevieve Yue *Nostradamus* Stéphane Gerson,2012-10-30 We all know the name Nostradamus but who was he really Why did his predictions become so influential in Renaissance Europe and then keep resurfacing for nearly five centuries And what does Nostradamus s endurance in the West say about us and our own world In *Nostradamus* How an Obscure Renaissance Astrologer Became the Modern Prophet of Doom historian St phane Gerson takes readers on a journey back in time to explore the life and afterlife of Michel de Nostredame the astrologer whose Prophecies have been interpreted adopted by successive media and eventually transformed into the Gospel of Doom for the modern age Whenever we seem to enter a new era whenever the premises of our worldview are questioned or imperiled Nostradamus offers certainty and solace In 1666 guests at posh English dinner parties discussed his quatrain about the Great Fire of London In 1942 the Jewish writer Ir ne N mirovsky latched her hopes for survival to Nostradamus prediction that the war would soon end And on September 12 2001 teenagers proclaimed on the streets of Brooklyn that this guy Nostradamus had seen the 9 11 attacks coming Through prodigious research in European and American archives Gerson shows that Nostradamus a creature of the modern West rather than a vestige from some antediluvian era tells us more about our past and our present than about our future In chronicling the life of this mystifying figure and the lasting fascination with his predictions Gerson s book becomes a historical biography of a belief the faith that we can know tomorrow and master our anxieties through the powers of an extraordinary but ever more elusive seer

Modern Enchantments Simon During,2009-06-30 A history of secular or non supernatural or entertainment magic as an important but neglected constituent of modern culture Nicholas Daly Magic Simon During suggests has helped shape modern

culture Devoted to this deceptively simple proposition During s superlative work written over the course of a decade gets at the aesthetic questions at the very heart of the study of culture How can the most ordinary arts and by magic During means not the supernatural but the special effects and conjurings of magic shows affect people Modern Enchantments takes us deeply into the history and workings of modern secular magic from the legerdemain of Isaac Fawkes in 1720 to the return of real magic in nineteenth century spiritualism to the role of magic in the emergence of the cinema Through the course of this history During shows how magic performances have drawn together heterogeneous audiences contributed to the molding of cultural hierarchies and extended cultural technologies and media at key moments sometimes introducing spectators into rationality and helping to disseminate skepticism and publicize scientific innovation In a more revealing argument still Modern Enchantments shows that magic entertainments have increased the sway of fictions in our culture and helped define modern society s image of itself Praise for ModernEnchantment During documents the extent to which magic and magical thinking have pervaded and continue to pervade secular life the author examines 19th and 20th century theatrical magic and commercial conjuring with great sensitivity to the social and cultural context in the Western world Equally fascinating is the analysis of magic and early film R Sugarman Choice A richly informed warmly argued addition to the growing number of books in which writers worry at the pervasive blurring of distinctions between act and appearance organic consciousness and artificial intelligence imagination and empirical experience illusion and thought reality TV and real life dreams and money Marina Warner Financial Times During moves confidently across three centuries of magic and covers aspects of a few more besides The sheer wealth of historical detail he provides is impressive but no less impressive is the subtlety of his argumentation and the suggestiveness of his claims This extremely significant piece of work will appeal to literary critics historians and not least devotees of magic Nicholas Daly author of Modernism Romance and the Fin de Si cle Popular Fiction and British Culture 1880 1914 **Net of Magic** Lee Siegel,1991-06-11 Scholar and magician Siegel uncovers the age old practices of magic in sacred rites and rituals and unveils the contemporary world of Indian magic of street and stage entertainers Siegel s journeys take him from ancient Sanskrit texts to the slums of New Dehli as he explores India s remarkable magical tradition Publisher s description **Seeing the Past with Computers** Kevin Kee,Timothy J Compeau,2019-02-01 Recent developments in computer technology are providing historians with new ways to see and seek to hear touch or smell traces of the past Place based augmented reality applications are an increasingly common feature at heritage sites and museums allowing historians to create immersive multifaceted learning experiences Now that computer vision can be directed at the past research involving thousands of images can recreate lost or destroyed objects or environments and discern patterns in vast datasets that could not be perceived by the naked eye Seeing the Past with Computers is a collection of twelve thought pieces on the current and potential uses of augmented reality and computer vision in historical research teaching and presentation The experts gathered here reflect upon their experiences working

with new technologies share their ideas for best practices and assess the implications of and imagine future possibilities for new methods of historical study Among the experimental topics they explore are the use of augmented reality that empowers students to challenge the presentation of historical material in their textbooks the application of seeing computers to unlock unusual cultural knowledge such as the secrets of vaudevillian stage magic hacking facial recognition technology to reveal victims of racism in a century old Australian archive and rebuilding the soundscape of an Iron Age village with aural augmented reality This volume is a valuable resource for scholars and students of history and the digital humanities more broadly It will inspire them to apply innovative methods to open new paths for conducting and sharing their own research
