Content Matters Leif Fearn,Eric Fearn,2013-06-26 A critical question in social studies education is not whether teachers develop and teach units of study but what is in the units of study teachers develop and teach Curricular planning and instruction must focus on what we teach in the social studies classroom It is not uncommon for students to experience fine units about the westward movement and exit the fifth grade with little or no geographic literacy Most students leave middle school grades unable to name even one person who made a difference in the history of Indian

people in the United States After three to five years of history classes high school students routinely self report that history is boring And it is the rare middle school graduate who knows how to use a free enterprise economy for his or her benefit This book explains the content of nine areas in social studies If teachers know what history biographical studies and the United States Constitution mean for instruction they can increase the probability of better focused content in their social studies instruction Spelling Grade 2 Debra Housel,2003-03-17 *The Seven Steps to Help Boys Love School* Linda Marie Gilliam,2015-04-14 The 7 Steps to Help Boys Love School Teaching to their Passion for Less Frustration is an easy to follow humorous book with practical researched strategies for ensuring boys success in school home and in their future pursuits This book is built upon the 7 Es of Excellent Education with step by step exciting lessons for both struggling and bright boys Girls love them too More children are being misdiagnosed with ADHD academics are required earlier in school recess is being cut out and many frustrated boys drop out by high school This prevalent frustration can lead to a child s lack of self confidence and self worth but worse yet aggression People are now realizing the increasing crisis facing us today with children slipping further and further behind other nations in Reading Writing Math and Science The many years of brain research proves over and over that boys and girls need different techniques in the classroom for their best learning environment This book will guide teachers and parents in activities that are appropriate for boys to excel in learning
