Beyond Classical Pedagogy Terry Wood,Barbara Scott Nelson,Janet E. Warfield,2014-04-04 The emergence of the National Council of Teachers of Mathematics Standards in 1989 sparked a sea change in thinking about the nature and quality of mathematics instruction in U S schools Much is known about transmission forms of mathematics teaching and the influence of this teaching on students learning but there is still little knowledge about the alternative forms of instruction that have evolved from the recent widespread efforts to reform mathematics education Beyond Classical Pedagogy Teaching Elementary School Mathematics reports on the current state of knowledge about these new instructional practices which differ in significant ways from the traditional pedagogy that has permeated mathematics education in the past This book provides a research based view of the nature of facilitative teaching in its relatively mature form along with opposing views and critique of this form of pedagogy The focus is on elementary school mathematics classrooms where the majority of the reform based efforts have occurred and on the micro level of teaching classroom interaction as a source for revealing the complexity involved in teaching teachers learning and the impact of both on children s learning The work in elementary mathematics teaching is situated in the larger context of research on teaching Research and insights from three disciplinary perspectives are presented the psychological perspective centers on facilitative teaching as a process of teachers learning the mathematical perspective focuses on the nature of the mathematical knowledge teachers need in order to engage in this form of teaching the sociological perspective attends to the interactive process of meaning construction as teachers and students create intellectual communities in their classrooms The multidisciplinary perspectives presented provide the editors with the necessary triangulation to provide confirming evidence and rich detail about the nature of facilitative teaching
