Richard Dawkins' God Delusion Klaus Nürnberger, 2010-07-12 Part I asks Is evolving Nature all there is self generated self sustaining self contained Are human beings as the topmost outgrowth of Nature responsible to none other but themselves That is the stance of naturalist and atheist Richard Dawkins Or is evolving reality derived from and dependent on a transcendent Source and Destiny to whom humans are accountable and whose benevolence reaches out to humans as persons because humans are persons That is the conviction of the Christian faith Part II shows that Dawkins interpretation of religion is deficient even in evolutionary terms and lacks the objectivity and impartiality of genuine science

The God Delusion Richard Dawkins, 2011-01-25 A preeminent scientist and the world's most prominent atheist asserts the irrationality of belief in God and the grievous harm religion has inflicted on society from the Crusades to 9/11 With rigor and wit Dawkins examines God in all his forms from the sex obsessed tyrant of the Old Testament to the more benign but still illogical Celestial Watchmaker favored by some Enlightenment thinkers He eviscerates the major arguments for religion and demonstrates the supreme improbability of a supreme being He shows how religion fuels war foments bigotry and abuses children buttressing his points with historical and contemporary evidence The God Delusion makes a compelling case that belief in God is not just wrong but potentially deadly It also offers exhilarating insight into the advantages of atheism to the

individual and society not the least of which is a clearer truer appreciation of the universe's wonders than any faith could ever muster

**Exposing Myths About Christianity** Jeffrey Burton Russell, 2012-05-15 Renowned historian Jeffrey Burton Russell famous for his studies of medieval history sets the record straight against the New Atheists and other cultural critics who charge Christianity with being outdated destructive superstitious unenlightened racist colonialist based on fabrication and other significant false accusations

**The New Atheism** Victor J. Stenger, 2009-12-04 In recent years a number of bestselling books have forcefully argued that belief in God can no longer be defended on rational or empirical grounds and that the scientific worldview has rendered obsolete the traditional beliefs held by Christianity Judaism and Islam The authors of these books Richard Dawkins Daniel Dennett Sam Harris Christopher Hitchens and Victor J Stenger have come to be known as the New Atheists Predictably their works have been controversial and attracted a good deal of critical reaction In this new book Victor J Stenger whose *God The Failed Hypothesis* was on the New York Times bestseller list in 2007 reviews and expands upon the principles of New Atheism and answers many of its critics He demonstrates in detail that naturalism the view that all of reality is reducible to matter and nothing else is sufficient to explain everything we observe in the universe from the most distant galaxies to the inner workings of the brain that result in the phenomenon of mind Stenger disputes the claim of many critics that the question of whether God exists is beyond the ken of science On the contrary he argues that absence of evidence for God is indeed evidence of absence when the evidence should be there and is not Turning from scientific to historical evidence Stenger then points out the many examples of evil perpetrated in the name of religion He also notes that the Bible which is still taken to be divine revelation by millions fails as a basis for morality and is unable to account for the problem of unnecessary suffering throughout the world Finally he discusses the teachings of ancient nontheist sages such as Buddha Lao Tzu and Confucius whose guidelines for coping with the problems of life and death did not depend upon a supernatural metaphysics Stenger argues that this way of nature is far superior to the traditional supernatural monotheisms which history shows can lead to a host of evils The New Atheism is a well argued defense of the atheist position and a strong rebuttal of its critics

examines specific issues and case studies These volumes bring detailed and careful debate of a range of controversies together in one place including topics not often covered for example how religions promote or hinder social cohesion and peace the relationship of religions to human rights and the intersection of Buddhism and violence Written by a range of experts that includes both established and emerging scholars the text explains key debates in ways that are accessible and easy to understand for lay readers as well as undergraduate students researching particular issues or global religious trends

**The One Creator God in Thomas Aquinas and Contemporary Theology** Michael J. Dodds, OP, 2020-08-21 This book provides a fundamental introduction to Aquinas's theology of the One Creator God Aimed at making that thought accessible to contemporary audiences it gives a basic explanation of his theology while showing its compatibility with contemporary science and its relevance to current theological issues Opening with a brief account of Aquinas's life it then describes the purpose and nature of the Summa Theologica and gives a short review of current varieties of Thomism Without neglecting other works it then focuses primarily on the discussion of the One God in the first part of the Summa Theologica God's transcendence and immanence is a recurrent theme in that discussion Evidence of God's immanent causality in the natural world grounds Aquinas's five arguments for the existence of God the Five Ways which then open onto God's transcendence The subsequent discussion of the divine attributes builds on the modes of God's causality established in the Five Ways It also shows the need for a language of analogy to preserve God's transcendence and prevent us from reducing God to the level of creatures even as qualities such as goodness and love which we first know from creatures are applied to God The discussion of God's providence and governance establishes that the transcendent Creator God is most intimately present in creation God acts in all creatures in a way that does not diminish their proper causality but is rather its source As there is no contradiction between God's transcendence and immanence so there is no competition between the primary causality of God and the secondary causality of creatures Empirical science which is limited by its method to the secondary causality of creatures is shown to be compatible with the broader discipline of theology which also embraces the primary causality of the Creator

**After the New Atheist Debate** Phil Ryan, 2014-01-01 Drawing on the social sciences philosophy and theology Ryan examines the claims of the New Atheists and of their various religious and secular opponents and finds both sides wanting

**The Darwinian Delusion** Michael Ebifegha, 2011-10-14 The postulate of molecules to human evolution by natural selection evolutionism like creationism cannot be demonstrated empirically Therefore the creationism evolutionism controversy offers a choice between intelligent design by God and unintelligent design by evolutionary selection Scientists are split on philosophical grounds since events in the immaterial realm are outside the purview of science In reality designers claim products no product of a process can account for how it was designed or for its ontology Accordingly Scientific American Editor John Rennie suggested that one way to override a purely evolutionary worldview is if the creator's appeared and claimed credit Author Michael Ebifegha's previous book The Death of Evolution provides the historical details of God's

ancient claim for creating the universe before an audience Dawkins in his *The God Delusion* failed to address this historical event hence his statement that There almost certainly is no God is flawed The *Darwinian Delusion* discusses the fossil record the role of natural selection the mystery of the origin of life and Gods affirmation of agency in world history Ebifegha argues that both the scientific and philosophical analysis point to God as the Creator and hence the delusion as such is not about God but about the Darwinian paradigm of materialism

**In Good Faith** Scott A. Shay,2018-09-04 Prominent atheists claim the Bible is a racist text Yet Dr Martin Luther King Jr read it daily Then again so did many ardent segregationists Some atheists claim religion serves to oppress the masses Yet the classic text of the French Revolution What is the Third Estate was written by a priest On the other hand the revolutionaries ended up banning religion What do we make of religion s confusing role in history And what of religion s relationship to science Some scientists claim that we have no free will Others argue that advances in neurobiology and physics disprove determinism As for whispering to the universe an absurd habit say the skeptics Yet prayer is a transformative practice for millions This book explores the most common atheist critiques of the Bible and religion incorporating Jewish Christian and Muslim voices The result is a fresh modern re evaluation of religion and of atheism Scott A Shay is a Co Founder and Chairman of Signature Bank and a longstanding Jewish community activist Shay started a Hebrew school an adult educational program and chaired several Jewish educational programs He is the author of *Getting our Groove Back How to Energize American Jewry* and has been thinking about religion reason and modernity since wondering why his parents sent him to Hebrew school

God Created the Universe with the Purpose to Serve Humankind Fateh Ullah Khan,2009 Challenging the New Atheism Aaron Shepherd,2020-08-31 This book presents a pragmatic response to arguments against religion made by the New Atheism movement The author argues that analytic and empirical philosophies of religion the mainstream approaches in contemporary philosophy of religion are methodologically unequipped to address the Threefold Challenge made by popular New Atheist thinkers such as Richard Dawkins Sam Harris Christopher Hitchens and Daniel Dennett The book has three primary motivations First it provides an interpretation of the New Atheist movement that treats their claims as philosophical arguments and not just rhetorical exercises or demagoguery Second it assesses and responds to these claims by elaborating four distinct contemporary philosophical perspectives analytic philosophy empirical philosophy continental philosophy and pragmatism as well as contextualizing these perspectives in the history of the philosophy of religion Finally the book offers a metaphilosophical critique returning again and again to the question of method In the end the author settles upon a modified version of pragmatism that he concludes is best suited for articulating the terms and stakes of the God Debate *Challenging the New Atheism* will be of interest to scholars and students of American philosophy and philosophy of religion

*God and the Folly of Faith* Victor J. Stenger,2012-04-03 A thorough and hard hitting critique that is a must read for anyone interested in the interaction between religion and science It has become the prevalent view among sociologists historians and some theistic scientists that religion and science have never

been in serious conflict Some even claim that Christianity was responsible for the development of science In a sweeping historical survey that begins with ancient Greek science and proceeds through the Renaissance and Enlightenment to contemporary advances in physics and cosmology Stenger makes a convincing case that not only is this conclusion false but Christianity actually held back the progress of science for one thousand years It is significant he notes that the scientific revolution of the seventeenth century occurred only after the revolts against established ecclesiastic authorities in the Renaissance and Reformation opened up new avenues of thought The author goes on to detail how religion and science are fundamentally incompatible in several areas the origin of the universe and its physical parameters the origin of complexity holism versus reductionism the nature of mind and consciousness and the source of morality In the end Stenger is most troubled by the negative influence that organized religion often exerts on politics and society He points out antiscientific attitudes embedded in popular religion that are being used to suppress scientific results on issues of global importance such as overpopulation and environmental degradation When religion fosters disrespect for science it threatens the generations of humanity that will follow ours

**The Age of Doubt** Christopher Lane, 2011-01-01 The Victorian era was the first great Age of Doubt and a critical moment in the history of Western ideas Leading nineteenth century intellectuals battled the Church and struggled to absorb radical scientific discoveries that upended everything the Bible had taught them about the world In *The Age of Doubt* distinguished scholar Christopher Lane tells the fascinating story of a society under strain as virtually all aspects of life changed abruptly In deft portraits of scientific literary and intellectual icons who challenged the prevailing religious orthodoxy from Robert Chambers and Anne Bronte to Charles Darwin and Thomas H Huxley Lane demonstrates how they and other Victorians succeeded in turning doubt from a religious sin into an ethical necessity The dramatic adjustment of Victorian society has echoes today as technology science and religion grapple with moral issues that seemed unimaginable even a decade ago Yet the Victorians crisis of faith generated a far more searching engagement with religious belief than the new atheism that has evolved today More profoundly than any generation before them the Victorians came to view doubt as inseparable from belief thought and debate as well as a much needed antidote to fanaticism and unbridled certainty By contrast a look at today's extremes from the biblical literalists behind the Creation Museum to the dogmatic rigidity of Richard Dawkins's atheism highlights our modern day inability to embrace doubt

**Against Atheism** Ian S. Markham, 2011-09-13 In this new book Ian Markham analyzes the atheistic world view opposing the arguments given by renowned authors of books on atheism such as Richard Dawkins Unlike other responses to the new atheism Markham challenges these authors on their own ground by questioning their understanding of belief and of atheism itself The result is a transforming introduction to Christianity that will appeal to anyone interested in this debate A fascinating challenge to the recent spate of successful books written by high profile atheist authors such as Richard Dawkins Christopher Hitchens and Sam Harris Tackles these authors on their own ground arguing that they do not understand the nature of atheism let alone theology and ethics Draws on ideas from Nietzsche cosmology and art to construct a powerful response that allows for a faith that is grounded yet one that recognizes the reality of uncertainty Succinct engaging but robustly argued this new book by a leading academic and writer contains a wealth of profound insights that show religious belief in a new light

**Evil in Genesis** Ingrid Faro, 2021-02-17 The genesis of evil The book of Genesis recites the beginnings of the cosmos and its inhabitants It also reveals the beginning of evil Before long evil infests God's good creation From there good and evil coexist and drive the plot of Genesis In *Evil in Genesis* Ingrid Faro uncovers

how the Bible's first book presents the meaning of evil Faro conducts a thorough examination of evil on lexical exegetical conceptual and theological levels This focused analysis allows the Hebrew terminology to be nuanced and permits Genesis own distinct voice to be heard Genesis presents evil as the taking of something good and twisting it for one's own purposes rather than enjoying it how God intended Faro illuminates the perspective of Genesis on a range of themes including humanity's participation in evil evil's consequences and God's responses to evil
