Books in the Digital Age John B. Thompson, 2013-10-21 The book publishing industry is going through a period of profound and turbulent change brought about in part by the digital revolution. What is the role of the book in an age preoccupied with computers and the internet? How has the book publishing industry been transformed by the economic and technological upheavals of recent years and how is it likely to change in the future? This is the first major study of the book publishing industry in Britain and the United States for more than two decades. Thompson focuses on academic and higher education publishing and analyses the evolution of these sectors from 1980 to the present. He shows that each sector is characterized by its own distinctive logic or dynamic of change and that by reconstructing this logic we can understand the problems, challenges and opportunities faced by publishing firms today. He also shows that the digital revolution has had and continues to have a profound impact on the book publishing business, although the real impact of this revolution has little to do with the ebook scenarios imagined by many commentators. *Books in the Digital Age* will become a standard work on the publishing industry at the beginning of the 21st century. It will be of great interest to students taking courses in the sociology of culture, media and cultural studies and publishing. It will also be of great value to professionals in the publishing industry, educators and policy makers and to anyone interested in books and their future.

Electronic Commerce 2018 Efraim Turban, Jon Outland, David King, Jae Kyu Lee, Ting-Peng Liang, Deborrah C. Turban, 2017-10-12 This new Edition of *Electronic Commerce* is a complete update of the leading graduate level advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating and discovering information. It is about e-learning, e-government, social networks and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade and, of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook, LinkedIn and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China, where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries, e.g., the shared economy models of Uber and Airbnb. The 2018 9th edition brings forth the latest trends in e-commerce, including smart commerce, social commerce, social collaboration, shared economy, innovations and mobility.
