Physical Geography , Literature 1974, Part 1 S. Böhme,U. Esser,W. Fricke,U. Güntzel-Lingner,F. Henn,D. Krahn,H. Scholl,G. Zech,2013-03-14 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume II contains literature published in 1974 and received before August 1974 some older literature which was received late and which is not recorded in earlier volumes is also included Beginning with this volume some minor changes of our classification scheme have been made We acknowledge with thanks contributions to this volume by Dr J Bouška who surveyed journals and publications in the Czech language and supplied us with abstracts in English and by the Commonwealth Scientific and Industrial Research Organization CSIRO Sydney for providing titles and abstracts of papers on radio astronomy National Library of Medicine Current Catalog National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965-70 Maritime Networks in the Ancient Mediterranean World Justin Leidwanger,Carl Knappett,2018-11-22 This book uses network ideas to explore how the sea connected communities across the ancient Mediterranean We look at the complexity of cultural interaction and the diverse modes of maritime mobility through which people and objects moved It will be of interest to Mediterranean specialists ancient historians and maritime archaeologists **Journal of Geological Education** ,1963 Human Aspects of Urban Form Amos Rapoport,2016-06-03 Human Aspects of Urban Form Towards a Man Environment Approach to Urban Form and Design discusses the man environment interaction in urban setting The book is comprised six chapters that provide a broad conceptual framework using a range of disciplines The text first tackles urban design as the organization of space time meaning and communication The second chapter talks about environmental quality while the third chapter deals with environmental cognition Next the book tackles the importance and nature of environmental perception Chapter 5 discusses the city in terms of social cultural and territorial variables Chapter 6 details the distinction between associational and perceptual worlds The book will be of great interest to urban planners and government policymakers Researchers and practitioners of sociological and behavioral science will also benefit from the book **Managing the Environment, Managing Ourselves** Richard N. L. Andrews,2008-10-01 In this book Richard N L Andrews looks at American environmental policy over the past four hundred years shows how it affects environmental issues and public policy decisions today and

poses the central policy challenges for the future This second edition brings the book up to date through President George W Bush s first term and gives the current state of American environmental politics and policy A guide to what every organizational decision maker public and private needs to know in an era in which environmental issues have become global
Lynton K Caldwell Public Administration Review A wonderful text for students and scholars of environmental history and environmental policy William L Andreen Environmental History Global Geomorphology Michael A.

Summerfield,2014-05-12 The plate tectonics revolution in the earth sciences has provided a valuable new framework for understanding long term landform development This innovative text provides a comprehensive introduction to the subject of global geomorphology with the emphasis placed on large scale processes and phenomena Integrating global tectonics into the study of landforms and incorporating planetary geomorphology as a major component the author discusses the impact of climatic change and the role of catastrophic events on landform genesis and includes a comprehensive study of surface geomorphic processes

Geographic Thought Tim Cresswell,2024-01-12 An accessible and engaging introduction to geographic thought In the newly expanded Second Edition of Geographic Thought A Critical Introduction renowned scholar Tim Cresswell delivers a thoroughly up to date and accessible examination of the major thinkers and key theoretical developments in the field Coverage of the complete range of the development of theoretical knowledge from ancient geography to contemporary theory appears alongside treatments of the influence of Darwin and Marx the emergence of anarchist geographies the impact of feminism and myriad other central bodies of thought This latest edition also includes new chapters on physical geography and theory postcolonialism and decoloniality and black geographies The author emphasizes the importance of geographic thought and its relevance to our understanding of what it means to be human and to the people places and cultures of the world in which we live This new edition contains New examples throughout consisting of contemporary research from a wider range of geographical contexts and by geographers from diverse backgrounds Comprehensive explorations of physical geography that combine updated coverage from the first edition with brand new material Updated discussions of spatial science and quantitative methods that include considerations of the role of place and specificity in quantitative work In depth examinations of the Anthropocene the uses of assemblage theory and the emergence of the GeoHumanities Perfect for students of undergraduate and graduate courses in geographic thought Geographic Thought A Critical Introduction will also earn a place in the libraries of students and scholars researching the history and philosophy of geography as well as practicing geographers

Popular Science Monthly and World Advance ,1896 **Geoscience Documentation** ,1984 **Introducing Biological Rhythms** Willard L. Koukkari,Robert B.

Sothorn,2007-07-29 Introducing Biological Rhythms is a primer that serves to introduce individuals to the area of biological rhythms It describes the major characteristics and discusses the implications and applications of these rhythms while citing scientific results and references Also the primer includes essays that provide in depth historic and other background

information for those interested in more specific topics or concepts It covers a basic cross section of the field of chronobiology clearly enough so that it can be understood by a novice or an undergraduate student but that it would also be sufficiently technical and detailed for the scientist The Popular Science Monthly ,1896 The Biosphere Vladimir I. Vernadsky,1998-03-27 Vladimir Vernadsky was a brilliant and prescient scholar a true scientific visionary who saw the deep connections between life on Earth and the rest of the planet and understood the profound implications for life as a cosmic phenomenon DAVID H GRINSPOON AUTHOR OF VENUS REVEALED The Biosphere should be required reading for all entry level students in earth and planetary sciences ERIC D SCHNEIDER AUTHOR OF INTO THE COOL THE NEW THERMODYNAMICS OF CREATIVE DESTRUCTION **Great Basin Evolution and Metallogeny** Geological Society of Nevada. Symposium,2011 **Marine Concrete** A.L. Marshall,2013-04-17 Concrete is commonly regarded as a mundane prosaic material whilst the sea is perceived as a fearsome environment endowed with mystery Mystery stems from lack of knowledge and to that extent both concrete and sea have something in common we fall a long way short of knowing enough about them Fortunately we have learned enough from our investigations and experiences to be able to set the limits within which we should operate It is important for the engineer to seek to quantify the effects of the environment on materials and structures so that these can be made safe and adequately durable for their intended economic life This is especially true for marine structures Thus the primary purpose of this book is to provide a useful synthesis of the behaviour of concrete and concrete structures in the marine environment An outline of the content of the book is provided in the latter part of the first chapter and so will not be anticipated here The chief aim throughout however is to work as far as possible within a context of the appropriate governing physical phenomena giving due consideration to the mathematical relationships between them Moreover without intending to be a design manual an introduction is given to the sources of information which designers are likely to use as well as to structural achievements It is hoped that there should emerge an implicit integration between structure and constituent materials and the surrounding environment **U.S. Geological Survey Professional Paper** ,1987 The Illusory Boundary Martin Reuss,Stephen H. Cutcliffe,2010-09-20 The view of nature and technology inhabiting totally different even opposite spheres persists across time and cultures Most people would consider an English countryside or a Louisiana bayou to be natural though each is to an extent the product of technology Pollution widely thought to be a purely man made phenomenon results partly from natural processes All around us things from the natural world are brought into the human world At what point do we consider them part of culture rather than nature And does such a distinction illuminate our world or obscure its workings This compelling new book challenges the view that a clear and unwavering boundary exists between nature and technology Rejecting this dichotomy the contributors show how the history of each can be united in a constantly shifting panorama where definitions of nature and technology alter and overlap In addition to recognizing the artificial divide between these two concepts the essays in this book demonstrate how such thinking may

affect societies ability to survive and prosper The answers and ideas are as numerous as the landscapes they consider for there is no single path toward a more harmonious vision of technology and nature Technologies that work in one place may not in another Nature that is preserved in one community might become the raw material of technological progress somewhere else Add to this the fact that the natural world and technology are not passive players but are profoundly involved in cultural construction Understanding such dynamics not only reveals a new historical complexity it prepares us for coping with many of the most difficult and pressing social issues facing us today Contributors Peter Coates Craig E Colten Stephen H Cutcliffe Hugh S Gorman Betsy Mendelsohn Joy Parr Peter C Perdue Sara B Pritchard Martin Reuss William D Rowley Edmund Russell Joel A Tarr Ann Vileisis James C Williams Thomas Zeller

A Critical Theory for the Anthropocene Nathanaël Wallenhorst, 2023-09-15 This volume which is rooted in biogeophysical studies addresses conceptions of political action in the Anthropocene and the tension between a desire to accomplish the Promethean project of modernity and a post Promethean approach This work explores the idea of an anthropological mutation of political consolidation from a post Promethean togetherness to creating the capacity to act together The political thinking of the human condition developed by Hannah Arendt is important here as a resource for thinking about humanity in terms of human adventure This has three dimensions hubris the world and coexistence referring respectively to the logic of profit of the homo oeconomicus the logic of responsibility of the homo collectivus and the logic of the hospitality of the homo religiosus The intellectual and political attitude outlined in this book is an extension of critical theory the work also puts forward a critique of what poses a problem in our relationship to the world and suggests how to overcome it the ultimate goal being social transformation The author propose an uprising and an anthropological consolidation of politics based on the revitalization that is brought about by the sharing of a conviviality both between humans and with what is non human The identification of conviviality as an educational paradigm to survive the Anthropocene gives us the much needed reason for hope despite this heritage of the Anthropocene In addition to Arendtian thinking this critical theory for the Anthropocene draws on the political thinking of several contemporary authors including Maurice Bellet Hartmut Rosa Andreas Weber Dominique Bourg and Christian Arnsperger This volume is of interest to researchers in the Anthropocene
