Beckett,2014-04-08 *Traditional Soap Making Techniques Explained* is a book that allows the reader to really learn about the evolution of the soap making process The other texts that are available on the market tend to give a brief synopsis of the history and tend to focus more on modernized soap recipes This text takes things back to the initial days of soap making when it was a necessity to do so and not a hobby for the consummate homemaker The process of making soap is not that difficult as long as the instructions are followed to the latter and the proper safety precautions are taken **Homemade Cleaners** Mandy O'Brien,Dionna Ford,2014-01-07 A comprehensive guide to natural cleaners that completely disinfect polish and freshen without the dangerous toxins Toxic chemicals are found in almost all commercial cleaners the very products people buy to make their homes hygienic and healthy The recipes in *Homemade Cleaners* use common affordable ingredients that not only get every room in the house sparkling and germ free but are also safe for families and the environment The green cleaners in this invaluable guide are all that is needed to keep a purified home without using harsh chemicals that can cause everything from skin irritation to central nervous system damage Using nontoxic materials like vinegar baking soda and even vodka *Homemade Cleaners* focuses on every floor wall window and appliance and includes methods for absorbing odors information on air purifying plants a primer on basic chemistry a checklist of essential supplies and tips for cutting down on waste *Soap-Making Manual. A practical Handbook on the RControl in the modern Soap Plant* E. G.

Thomssen,2016-08-28 The material contained in this work appeared several years ago in serial form in the *American Perfumer and Essential Oil Review* Owing to the numerous requests received it has been decided to now place before those interested these articles in book form While it is true that the works pertaining to the soapmaking industry are reasonably plentiful books are quite rare however which in a brief volume will clearly outline the processes employed together with the

necessary methods of analyses from a purely practical standpoint In the work presented the author has attempted to briefly clearly and fully explain the manufacture of soap in such language that it might be understood by all those interested in this industry In many cases the smaller plants find it necessary to dispense with the services of a chemist so that it is necessary for the soapmaker to make his own tests The tests outlined therefore are given as simple as possible to meet this condition The formulae submitted are authentic and in many cases are now being used in soapmaking In taking up the industry for survey it has been thought desirable to first mention and describe the raw materials used second to outline the processes of manufacture third to classify the methods and illustrate by formulae the composition of various soaps together with their mode of manufacture fourth to enumerate the various methods of glycerine recovery including the processes of saponification and fifth to give the most important analytical methods which are of value to control Pg iv the process of manufacture and to determine the purity and fitness of the raw material entering into it
