Homes in a Box, 1998 Facsimile reproduction of the Sears modern home catalog Introduced by Rebecca L. Hunter, 2012-07-20 The rapid westward expansion of the United States in the early twentieth century set the stage for a new industry mail order homes Sold by such companies as Sears Roebuck Co Aladdin and Montgomery Ward these kit homes were shipped by train to their purchasers in boxcars containing everything required for their construction whether a vacation cottage modest bungalow or two and a half story home Rebecca Hunter brings to life the history of these charming homes tens of thousands of which were sold throughout the United States in the early 1900s and many of which still exist Fully illustrated and including numerous images from period catalogs this book describes the customers who bought and built mail order houses the various styles and designs and the boom and bust of the industry *Houses from Books* Daniel D. Reiff, 2010-11-01 Many homes across America have designs based on plans taken from pattern books or mail order catalogs In *Houses from Books* Daniel D Reiff traces the history of published plans and offers the first comprehensive survey of their influence on the structure and the style of American houses from 1738 to 1950 *Houses from Books* shows that architectural publications from Palladio's *I Quattro Libri* to Aladdin's Ready Cut Homes played a decisive role in every aspect of American domestic building Reiff discusses the people and the firms who produced the books as well as the ways in which builders and architects adapted the designs in communities throughout the country His book also offers a wide ranging analysis of the economic and social conditions shaping American building practices As architectural publication developed and grew more sophisticated it played an increasingly prominent part in the design and the construction of domestic buildings In villages and small towns which often did not have professional architects the publications became basic resources for carpenters and builders at all levels of expertise Through the use of published designs they were able to choose among a variety of plans styles and individual motifs and engage in a fruitful dialogue with past and present architects *Houses from Books* reconstructs this dialogue by examining the links between the published designs and the houses themselves Reiff's book will be indispensable to architectural historians architects preservationists and regional historians Realtors and homeowners will also find it of great interest A catalog at the end of the book can function as a guide for those attempting to locate a model and a date for a particular design *Houses from Books* contains a wealth of photographs many by the author that enhance its importance as a history and guide *The Emergence of the Interior* Charles Rice, 2006-11-22 Taking a radical position counter to many previous histories and theories of the interior domesticity and the home *The Emergence of the Interior* considers how the concept and experience of the domestic interior have been formed from the beginning of the nineteenth century It considers the interior's emergence in relation to the thinking of Walter Benjamin and Sigmund Freud and through case studies in architecture's trajectories toward modernism The book argues that the interior emerged with a sense of doubleness being understood and experienced as both a spatial and an image based condition

Incorporating perspectives from architecture critical history and theory and psychoanalysis The Emergence of the Interior will be of interest to academics and students of the history and theory of architecture and design social history and cultural studies The Greenwood Guide to American Popular Culture: Almanacs through Do-it-yourself M.
