

Homework 4 Solutions

Prof. Dr. Alexander
May 2020

The following is a brief discussion of mathematical analysis for Richard Riemann and 19th century teachers.

19.1. Let $\{x_n\}_{n \in \mathbb{N}}$ and $\{y_n\}_{n \in \mathbb{N}}$ be arbitrary convergent series. Show that the series $\{x_n + y_n\}_{n \in \mathbb{N}}$ converges.

Solution: Since $\{x_n\}_{n \in \mathbb{N}}$ and $\{y_n\}_{n \in \mathbb{N}}$ converge, by Theorem 19.1, $\{x_n\}_{n \in \mathbb{N}}$ and $\{y_n\}_{n \in \mathbb{N}}$ converge from the 19th century.

$$\sqrt{(x_n + y_n)^2} = \sqrt{(x_n)^2 + (y_n)^2} \leq \sqrt{(x_n)^2 + (y_n)^2 + 2|x_n y_n|} = |x_n| + |y_n|$$

By the Theorem 19.1 (convergence) from the 19th century, we see that $\{x_n + y_n\}_{n \in \mathbb{N}}$ converges absolutely, therefore converges in the 19th century.

19.2. Show the radius of convergence of $\sum_{n=0}^{\infty} x^n$ is 1. Show the convergence of the power series in the center of $x = 0$ is 1.

Solution:
Let $\{x_n\}_{n \in \mathbb{N}}$ be the
from the 19th century.

$$\lim_{n \rightarrow \infty} \left| \frac{x_{n+1}}{x_n} \right| = \lim_{n \rightarrow \infty} \left| \frac{x_{n+1}}{x_n} \right| = 1$$

so by the ratio test, the series converges absolutely for $|x| < 1$ and $|x| > 1$.

Let $\{x_n\}_{n \in \mathbb{N}}$ be the
from the 19th century.

$$\lim_{n \rightarrow \infty} \left| \frac{x_{n+1}}{x_n} \right| = \lim_{n \rightarrow \infty} \left| \frac{x_{n+1}}{x_n} \right| = 1$$

so by the ratio test, the series converges absolutely for $|x| < 1$ and $|x| > 1$. From Theorem 19.1, we see that $\{x_n\}_{n \in \mathbb{N}}$ converges absolutely, therefore converges in the 19th century.

Let $\{x_n\}_{n \in \mathbb{N}}$ be the
from the 19th century.

$$\lim_{n \rightarrow \infty} \left| \frac{x_{n+1}}{x_n} \right| = \lim_{n \rightarrow \infty} \left| \frac{x_{n+1}}{x_n} \right| = 1$$

so by the ratio test, the series converges absolutely for $|x| < 1$ and $|x| > 1$. From Theorem 19.1, we see that $\{x_n\}_{n \in \mathbb{N}}$ converges absolutely, therefore converges in the 19th century.

Let $\{x_n\}_{n \in \mathbb{N}}$ be the

19.3. Show that the radius of convergence of $\sum_{n=0}^{\infty} x^n$ is 1. Show the convergence of the power series in the center of $x = 0$ is 1.

Flow Networks Michael T. Todinov, 2013-01-16 Repairable flow networks are a new area of research which analyzes the repair and flow disruption caused by failures of components in static flow networks This book addresses a gap in current network research by developing the theory algorithms and applications related to repairable flow networks and networks with disturbed flows The theoretical results presented in the book lay the foundations of a new generation of ultra fast algorithms for optimizing the flow in networks after failures or congestion and the high computational speed creates the powerful possibility of optimal control of very large and complex networks in real time Furthermore the possibility for re optimizing the network flows in real time increases significantly the

yield from real production networks and reduces to a minimum the flow disruption caused by failures The potential application of repairable flow networks reaches across many large and complex systems including active power networks telecommunication networks oil and gas production networks transportation networks water supply networks emergency evacuation networks and supply networks The book reveals a fundamental flaw in classical algorithms for maximising the throughput flow in networks published since the creation of the theory of flow networks in 1956 Despite the years of intensive research the classical algorithms for maximising the throughput flow leave highly undesirable directed loops of flow in the optimised networks These flow loops are associated with wastage of energy and resources and increased levels of congestion in the optimised networks Includes theory and practical examples to build a deep understanding of the issues Written by the leading scholar and researcher in this emerging field Features powerful software tools for analysis optimization and control of repairable flow networks *Mathematical Reviews* ,1985 **Reshaping College**

Mathematical Analysis I Claudio Canuto, Anita Tabacco, 2008-08-04 The recent European Programme Specification has forced a reassessment of the structure and syllabus of the entire system of Italian higher education and a ensuing rethinking of the teaching material Nowadays many lecture courses especially rudimentary ones demand that students master a large amount of theoretical and practical knowledge in a span of just few weeks in order to gain a

small number of credits. As a result, instructors face the dilemma of how to present the subject matter. They must make appropriate choices about lecture content, the comprehension level required from the recipients, and which kind of language to use.

Introductory Mathematical Analysis for Students of Business and Economics Ernest F. Haeussler, Richard S. Paul, 1976

Problems in Mathematical Analysis: Continuity and differentiation Wiesława J. Kaczor, Maria T. Nowak, 2000

We learn by doing. We learn mathematics by doing problems. And we learn more mathematics by doing more problems. This is the sequel to *Problems in Mathematical Analysis I*, Volume 4 in the Student Mathematical Library series. If you want to hone your understanding of continuous and differentiable functions, this book contains hundreds of problems to help you do so. The emphasis here is on real functions of a single variable. The topics include continuous functions, the intermediate value property, uniform continuity, mean value theorems, Taylor's formula, convex functions, sequences, and series of functions. The book is mainly geared toward students studying the basic principles of analysis. However, given its selection of problems, organization, and level, it would be an ideal choice for tutorial or problem-solving seminars, particularly those geared toward the Putnam exam. It is also suitable for self-study. The presentation of the material is designed to help student comprehension, to encourage them to ask their own questions, and to start research. The collection of problems will also help teachers who wish to incorporate problems into their lectures. The problems are grouped into sections according to the methods of solution. Solutions for the problems are provided. This is the sequel to *Problems in Mathematical Analysis I*, Volume 4 in the Student Mathematical Library series. Also available from the AMS is *Problems in Analysis III*.

Mathematical Analysis and Applications—Plenary Lectures Luigi G. Rodino, Joachim Toft, 2018-11-11

This book includes the texts of the survey lectures given by plenary speakers at the 11th International ISAAC Congress held in Växjö, Sweden, on 14–18 August 2017. It is the purpose of ISAAC to promote analysis, its applications, and its interaction with computation. Analysis is understood here in the broad sense of the word, including differential equations, integral equations, functional analysis, and function theory. With this objective, ISAAC organizes international Congresses for the presentation and discussion of research on analysis. The plenary lectures in the present volume, authored by eminent specialists, are devoted to some exciting recent developments, topics including local solvability for subprincipal type operators, fractional order Laplacians, degenerate complex vector fields in the plane, lower bounds for pseudo-differential operators, a survey on Morrey spaces, localization operators in Signal Theory and Quantum Mechanics. Thanks to the accessible style used, readers only need a basic command of Calculus. This book will appeal to scientists, teachers, and graduate students in Mathematics, in particular Mathematical Analysis, Probability and Statistics, Numerical Analysis, and Mathematical Physics.
