Inventing the German Nation in Travel Literature, 1738-1839 Karin Baumgartner, 2025 Far into the nineteenth century Germany was not yet a nation state but a conglomeration of principalities The causes and consequences of its belatedness compared to other European countries such as England and France have been much debated The present book breaks new ground by identifying travel literature as an important factor in the forging of a distinct and cohesive German identity well before political unification in 1871 First foreign travelers accounts travelogues guidebooks referred to and treated Germany as a distinct place even though it was still politically divided thus enabling German readers to imagine their fragmented nation as a conceptual whole Second Germans themselves began to explore their homeland and write travelogues that solidified the nascent sense of national identity Ethnographic descriptions from places and peoples far away further aided this process as Germans learned to view themselves through this particular lens Surveying a large corpus of German and some British and French travelogues travel handbooks and popular geographic texts and bringing to bear discourses of nationalism and geography including Edward Soja s seminal concept of Thirdspace Karin Baumgartner reveals what travel writing can tell us about conceptual changes in geographic paradigms and national identity in Germany in the eighteenth and nineteenth centuries
