Spot meter adjusts the exposure for the absolute center of the scene, for example the road ahead instead of the interior of the car. SETTING VIDEO LIVE FEED ON / OFF

You can set your camera to send a live video signal out the side TV or HDMI ports by toggling the VIDEO LIVE FEED setting on, and off. Video Live Feed is not available if the USB port is not available. When Video Live Feed is set to OFF (UPd) the camera will switch into video / photo playback mode when one of the included TV cables are plugged into the camera. Video Live Feed is set to ON (UP) and the camera will switch into recording mode when plugged into a TV and will send a live video signal to the TV. Plugging in the component cable will send an HD video signal out from the camera, and plugging in the composite cable will send a standard definition signal out from the camera. Video Live Feed On allows for plugging the camera into wireless transmitters and TVs for live viewing from the camera. NOTE: If the component cable is used to send live HD video out from the camera, and you begin simultaneously recording HD video to the SD card, the live video feed will be reduced to standard definition as the camera cannot record and transmit HD video at the same time. If you wish to have an HD live video feed from the camera you cannot begin recording HD video to the SD card.
