Grimley expertly explains neuro linguistic programming NLP to the advanced coach and counsellor by asking a simple
question What is NLP Inviting us on his personal journey he provides the reader in this book with an insight as to how he
coaches using his own NLP model as well as exploring the complexity of NLP as a practice and why it tends to polarise
opinion in today's coaching landscape Grimley insists that if the NLP paradigm is to find credible traction in the modern
world it needs to test its claims in the same way as other academic disciplines based on his own research this book does just
that Incorporating contemporary psychological understanding and neuroscientific research throughout it provides a
complete NLP model outlining specific steps for the reader to follow in order to achieve excellence in coaching It includes
case studies exercises and reflective questions which will encourage both novice and advanced coaches to explore the
benefits of NLP understanding and taking into account emotions and the unconscious mind in their practice By analysing the
NLP landscape this book also addresses many issues which are shared by the broader coaching community such as
differentiation from counselling professional status and lack of a reliable empirical evidence base Ground breaking and
thought provoking this book offers a modern examination of NLP Highlighting why NLP is still useful and popular and
exploring why it fills a gap in the market place for effective coaching this book will be essential reading for all coaches in
practice and training coach supervisors and counsellors with an interest in coaching techniques **The United States**
