Uncertain Decisions Luigi Luini, 2012-12-06 Uncertain Decisions Bridging Theory and Experiments presents advanced directions of thinking on decision theory in particular the more recent contributions on non expected utility theory fuzzy decision theory and case based theory This work also provides theoretical insights on measures of risk aversion and on new problems for general equilibrium analysis It analyzes how the thinking that underlies the theories described above spills over into real decisions and how the thinking that underlies these real decisions can

explain the discrepancies between theoretical approaches and actual behavior This work elaborates on how the most recent laboratory experiments have become an important source both for evaluating the leading theory of choice and decision and for contributing to the formation of new models regarding the subject *Post Keynesian and Ecological Economics* Richard P. F. Holt, Steven Pressman, Clive L. Spash, 2009 This book argues that mainstream economics with its present methodological approach is limited in its ability to analyze and develop adequate public policy to deal with environmental problems and sustainable development Each chapter provides major insights into many of today's environmental problems such as global warming and sustainable growth Building on the strengths and insights of Post Keynesian and ecological economics and incorporating cutting edge work in economic complexity bounded rationality and socio economic dynamics this book provides an interdisciplinary approach to deal with a broad range of environmental concerns The contributors show how and where the two traditions share common ground concerning environmental problems and shed light on how the two schools can learn from one another The book will be of great value to Post Keynesian and ecological economists as well as to those interested in new approaches to important global environmental issues **World History** ,2000
