Ministry of Agriculture, 1968 Since october 1929 when this bulletin was first published to meet the demand for information on the best methods by which fruits and vegetables can be preserved for use when the fresh products are not available the development of modern techniques of food processing has tended to diminish seasonal variations in the pattern of the diet In spite of this there is a steady demand for simple but reliable methods of home preservation which are based on scientific principles and the bulletin is widely acknowledged as a basic practical handbook The Home Preservation of Fruits and Vegetables Lillian Peek, 1918 **Home Preservation of Fruits and Vegetables** University of Connecticut. Cruess, 2015-08-06 Excerpt from Home and Farm Food Preservation Since early historical time food preservation has been second only in importance to food production Grapes and other fruits were dried by the ancients to preserve them fruit juices were fermented to make wines and vinegars cereals and vegetables were stored to protect them against moisture and decay olives were preserved by salting and meats were salted dried and smoked The use of sugar and vinegar in preserving fruits and vegetables came later The preservation of foods by sterilization in sealed containers is a development of the nineteenth century and dates from its discovery by

Nicholas Appert in France about 1800 Cold storage as a means of preserving all perishable products has during the past century developed into a very great industry Three billion cans of food valued retail at 600 000 000 were sold in the United States in 1916 The meat packing and cold storage industries compare favorably with the canning industries in size The wholesale value of the raisin crop in California is over 10 000 000 annually The other dried fruit industries are smaller but their aggregate value amounts to many millions of dollars yearly in the United States From this the importance of commercial food preservation may be seen Commercial food preservation cares for the bulk of the food products but beside the food so preserved there are many millions of jars and cans of fruits and vegetables glasses of jellies jams and marmalades and many thousands of hams and bacons put up by the housewife and farmer Much food that would otherwise be wasted is saved and in addition a varied diet throughout the year at low cost is made available in many homes About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
