Judaism And The Doctrine Of Creation:

Judaism and the Doctrine of Creation Norbert M. Samuelson, 1994-11-24 The topic of this book is creation It breaks down into discussions of two distinct but interrelated questions what does the universe look like and what is its origin The opinions about creation considered by Norbert Samuelson come from the Hebrew scriptures Greek philosophy Jewish philosophy and contemporary physics His perspective is Jewish liberal and philosophical It is Jewish because the foundation of the discussion is biblical texts interpreted in the light of traditional rabbinic texts It is philosophical because the subject matter is important in both past and present philosophical texts and to Jewish philosophy in particular Finally it is liberal because the authorities consulted include heterodox as well as orthodox Jewish sources The ensuing discussion leads to original conclusions about a diversity of topics including the limits of human reason and religious faith and the relevance of scientific models to religious doctrine

The Doctrine of Creation Bruce Riley Ashford, Craig G. Bartholomew, 2020-11-10 According to Bruce Ashford and Craig Bartholomew one of the best sources for regaining a robust biblical doctrine of creation is the recovery of Dutch neo Calvinism Tracing historical treatments and exploring theological themes Ashford and Bartholomew develop the Kuyperian tradition s rich resources on creation for systematic theology and the life of the church today

Creation in Jewish and Christian Tradition Henning Graf Reventlow, Yair Hoffman, 2002-04-30 In this volume Jewish and Christian perspectives on creation of the Bible with contemporary theological philosophical and political issues are raised by the Biblical Jewish Christian concepts of creation

Norbert M. Samuelson: Reasoned Faith Hava Tirosch-Samuelson, Aaron W. Hughes, 2015-08-25 Norbert M Samuelson is Harold and Jean Grossman Chair of Jewish Studies and Professor of Religious Studies at Arizona State University in Tempe Arizona Trained as an analytic philosopher he went on to establish the Academy of Jewish Philosophy in 1980 which contributed greatly to the professionalization of Jewish philosophy in America An ordained Reform rabbi a constructive theologian and a public intellectual Samuelson has insisted that philosophy is the very heart of Judaism and that in order to survive in the 21st century Judaism must rethink itself in light of contemporary science Through his scholarship and organizational work he has brought a Jewish voice to the dialogue of religion and science Viewing Jewish philosophy as central to the understanding of the Jewish past Samuelson has explicated the philosophical dimension of Judaism from the Bible to the present

[Toward a Negative Theology of Judaism](#) Ernest Rubinstein, 2025-07-29 This book reimagines Judaism and Jewish identity after the time honored method of negative theology It builds on negations that clear space for revisioning of such topics as creation and revelation the people and State of Israel history and suffering ritual and ethics God and spiritual life The theology builds on thought from key figures in the history of Jewish philosophy and serves along the way as an introduction to them including Ecclesiastes Philo Saadia Gaon Judah Halevi Maimonides Spinoza Moses Mendelssohn Nachman Krochmal Hermann Cohen Franz Rosenzweig Martin Buber Abraham Joshua Heschel Emil Fackenheim Emmanuel Levinas Yeshayahu Leibowitz and more A key finding is that a shared

negation binds God and the Jewish people together their joint refusal to submit to contentful constrictive definition

Creation and Religious Pluralism David Cheetham, 2020 In the well worn debates about religious pluralism and the theology of religions there have been many different rubrics used to account for comprehend or engage with the religious other This book is chiefly a work of Christian theology and seeks to bring the doctrine of creation and the theology of religions into dialogue and in so doing it comes at things from a different direction than other works It contains an extensive exploration of the doctrine of creation and asks how it might intervene distinctively in these discourses to produce a new conceptual and practical topography It will consider inter religious engagement from the perspective of the doctrine of I creatio ex nihilo I that forms the dominant view in the Jewish Christian and Islamic traditions The book pays close consideration to anthropology i e creaturehood the quotidian and wisdom the idea of sabbath human action and work and vivifying the immanent through a consideration of some representative phenomenologists The book will develop these ideas in a more practical direction by considering sacraments and rituals in the public sphere as well as attempting to describe the kind of creational politics that might bring traditions into dialogue Whilst these themes challenge more conventional ways of considering relations between religions such themes because they are different from concerns commonly found in the literature can also be profitably engaged with across the spectrum of opinion i e exclusivist or pluralist etc Thus whilst the position adopted in this work is I creatio ex nihilo I part of the motivation is to review the ways in which this focus helps to broaden rather than limit the discussion

From Nothing Ian A. McFarland, 2014-08-22 Too often the doctrine of creation has been made to serve limited or pointless ends like the well worn arguments between science and faith over the question of human and cosmic origins Given this history some might be tempted to ignore the theology of creation thinking it has nothing new or substantive to say They would be wrong In this stimulating volume Ian A McFarland shows that at the heart of the doctrine of creation lies an essential truth about humanity we are completely dependent on God Apart from this realization little else about us makes sense McFarland demonstrates that this radical dependence is a consequence of the doctrine of creatio ex nihilo creation from nothing Taking up the theological consequences of creation theodicy and Providence the author provides a detailed and innovative constructive theology of creation Drawing on the biblical text classical sources and contemporary thought From Nothing proves that a robust theology of creation is a necessary correlate to the Christian confession of redemption in Jesus Christ

The New Mormon Challenge Zondervan, 2010-12-21 Current facts about Mormonism Over 11 million members Over 60 000 full time missionaries more than any other single missionary sending organization in the world More than 310 000 converts annually As many as eighty percent of converts come from Protestant backgrounds In Mormon circles the saying is We baptize a Baptist church every week Within fifteen years the numbers of missionaries and converts will roughly double Within eighty years with adherents exceeding 267 million Mormonism could become the first world religion to arise since Islam You may know the statistics What you probably don t know are the

advances the Church of Jesus Christ of Latter day Saints LDS is making in apologetics and academic respectability With superb training Mormon scholars outclass many of their opponents Arguments against Mormon claims are increasingly refuted as outdated misinformed or poorly argued The New Mormon Challenge is a response to the burgeoning challenge of scholarly Mormon apologetics Written by a team of respected Christian scholars it is free of caricature sensationalism and diatribe The respectful tone and responsible rigorous yet readable scholarship set this book in a class of its own It offers freshly researched and well documented rebuttals of Mormon truth claims Most of the chapter topics have never been addressed and the criticisms and arguments are almost entirely new But The New Mormon Challenge does not merely challenge Mormon beliefs it offers the LDS Church and her members ways to move forward The New Mormon Challenge will help you understand the intellectual appeal of Mormonism and it will reveal many of the fundamental weaknesses of the Mormon worldview Whether you are sharing the gospel with Mormons or are investigating Mormonism for yourself this book will help you accurately understand Mormonism and see the superiority of the historic Christian faith Outstanding scholarship and sound methodology make this an ideal textbook The biblical historical scientific philosophical and theological discussions are fascinating and will appeal to Christians and Mormons alike Exemplifying Christian scholarship at its best The New Mormon Challenge pioneers a new genre of literature on Mormonism The Editors Francis J Beckwith Carl Mosser and Paul Owen are respected authorities on the Church of Jesus Christ of Latter day Saints and the authors of various books and significant articles on Mormonism With contributors including such respected scholars as Craig L Blomberg William Lane Craig J P Moreland and others The New Mormon Challenge is as Richard Mouw states in his foreword an important event for both Protestant evangelicals and Mormons that models to the evangelical community what it is like to engage in respectful and meaningful exploration of a viewpoint with which we disagree on key points *Creation Out of Nothing* Paul Copan, William Lane Craig, 2004-06 Addresses the biblical philosophical and scientific bases for the doctrine of creation out of nothing while countering contemporary trends that are assailing this doctrine **Judaism and Hellenism** Martin Hengel, 2003-03-14 Martin Hengel gathers an encyclopedic amount of material ancient and modern to present an exhaustive survey of the early course of Hellenistic civilization as it related to developing Judaism The result is a highly readable account of a largely unfamiliar world which is indispensable for those interested in Judaism and the birth of Christianity alike An extensive section of notes and bibliography is included *Causality* Jeaneane Fowler, 2020-02-21 This book examines the concepts of cause and effect from two dimensions The first concerns the macrocosm of the Universe and how each belief system views creation The second dimension explores the ways in which beliefs about creation influence the microcosmic world in terms of the nature of the self the proximate goals within each system the answers each belief system offers to the presence of evil and suffering in existence and ideas about the ultimate goal of release from them All these ideas inform and are fundamental to the understanding of the present day practices of different faiths presenting challenges for scriptural

testimony balanced with existential living The final two chapters explore current research in physics concerning the beginnings of the cosmos and what implications such research might have for existence within it with the final chapter examining scientific views of the nature of the self Contents include Judaic and Christian Traditions Islam Hinduism Early Buddhism Sikhism Classical Taoism Recycled Stardust Ashes to Ashes and Dust to Atoms The Life and Death of the Self

The Kalām Cosmological Argument: A Reassessment Jacobus Erasmus, 2018-01-08 This book offers a discussion of the kalām cosmological argument and presents a defence of a version of that argument after critically evaluating three of the most important versions of the argument It argues that since the versions of the kalām cosmological argument defended by Philoponus c 490 c 570 al Ghazālī 1058 1111 and the contemporary philosopher William Lane Craig all deny the possibility of the existence of an actual infinite these arguments are incompatible with Platonism and the view that God foreknows an endless future This conclusion however is not a problem for the proponents of the kalām cosmological argument for the book shows how the argument can be defended without denying the possibility of the actual infinite In order to offer a comprehensive analysis of Philoponus and al Ghazālī's cosmological arguments the book draws on recent English translations of some of their works Next the book advances a detailed argument against the popular argument based on the impossibility of an actual infinite Finally the book offers a unique defence of the kalām cosmological argument by defending philosophical arguments for a beginning of time that do not deny the actual infinite evaluating which hypothesis best explains the discoveries of modern cosmology and offering an argument in support of the premise that if the universe came into existence then God brought it into existence

The Word Made Flesh Ian A. McFarland, 2019-09-03 Most theologians believe that in the human life of Jesus of Nazareth we encounter God Yet how the divine and human come together in the life of Jesus still remains a question needing exploring The Council of Chalcedon sought to answer the question by speaking of one and the same Son our Lord Jesus Christ the same perfect in divinity and also perfect in humanity the same truly God and truly a human being But ever since Chalcedon the theological conversation on Christology has implicitly put Christ's divinity and humanity in competition While ancient and not so ancient Christologies from above focus on Christ's divinity at the expense of his humanity modern Christologies from below subsume his divinity into his humanity What is needed says Ian A McFarland is a Chalcedonianism without reserve which not only affirms the humanity and divinity of Christ but also treats them as equal in theological significance To do so he draws on the ancient christological language that points to Christ's nature on the one hand and his hypostasis or personhood on the other And with this McFarland begins one of the most creative and groundbreaking theological explorations into the mystery of the incarnation undertaken in recent memory

Containing the proceedings of the convention The Essence of Christianity Ludwig Feuerbach,1881 The Greenie's Guide to the End of the World Theodore McCall,2011 There is an old fundamentalist argument that the world will eventually be destroyed in the Apocalypse so there is no point in caring for it When one reads about the delicate balance of the first moments of the cosmos one can only marvel at the process which brought about the existence of the earth and the creatures that inhabit it One of Theo McCall s joys in life is cycling He lives in the city of Adelaide South Australia a perfect city for cycling When he first began this project once or twice a week he would cycle in the early morning The last part of the return trip would involve riding eastwards into the rising sun Whenever he felt the warmth of the sun on his face and was aware of its sheer power and energy he was convinced that the universe is an overwhelmingly beautiful place which God would never abandon or destroy It is with this complete faith in God s love for creation that he set out to write an account of how this creation with all its beauty and fragility as well as its flaws and scars might be transformed into God s new creation Given the ecological crisis that we face how can we meaningfully talk about the consummation of all things without removing the impetus for ecological action In other words is it possible to develop an ecological eschatology **Judaism's Story of Creation** Jacob Neusner,2021-09-06 During the formative age of Judaism the first seven centuries CE the great rabbis thought deeply about beginnings in light of endings They imposed upon their sequential reading of each passage the accumulated results of their reflection about all passages Thus they encompassed Scripture so as to describe the world as God had intended it to be This act of intellect resulted in two distinct ahistorical media of thought and expression the Halakhah law and Aggadah lore The author provides three systematic accounts of the Halakhic reading and two Aggadic accounts The Halakhic accounts cover 1 Work and Rest 2 Ownership and Possession Eden and the Land and 3 Ownership and Possession in the Household The Aggadic accounts pertain to 1 the Six Days of Creation and 2 Adam and Eve The Name of God in Jewish Thought Michael T Miller,2015-10-16 One of the most powerful traditions of the Jewish fascination with language is that of the Name Indeed the Jewish mystical tradition would seem a two millennia long meditation on the nature of name in relation to object and how name mediates between subject and object Even within the tide of the 20th century s linguistic turn the aspect most notable in the almost entirely secular Jewish philosophers is that of the personal name here given pivotal importance in the articulation of human relationships and dialogue The Name of God in Jewish Thought examines the texts of Judaism pertaining to the Name of God offering a philosophical analysis of these as a means of understanding the metaphysical role of the name generally in terms of its relationship with identity The book begins with the formation of rabbinic Judaism in Late Antiquity travelling through the development of the motif into the Medieval Kabbalah where the Name reaches its grandest and most systematic statement and the one which has most helped to form the ideas of Jewish philosophers in the 20th and 21st Century This investigation will highlight certain metaphysical ideas which have developed within Judaism from the Biblical sources and which present a direct challenge to the paradigms of western

philosophy Thus a grander subtext is a criticism of the Greek metaphysics of being which the west has inherited and which Jewish philosophers often subject to challenges of varying subtlety it is these philosophers who often place a peculiar emphasis on the personal name and this emphasis depends on the historical influence of the Jewish metaphysical tradition of the Name of God Providing a comprehensive description of historical aspects of Jewish Name Theology this book also offers new ways of thinking about subjectivity and ontology through its original approach to the nature of the name combining philosophy with text critical analysis As such it is an essential resource for students and scholars of Jewish Studies
