Coping with the Future Hans Christian Garmann Johnsen, Halvor Holtskog, Richard Ennals,2018-03-21 Coping with the Future has been written in response to widespread international awareness that the future is not predictable In political and economic terms we are in unknown territory with daily developments around Brexit and the Trump Presidency and Kodak moments in business On the other hand business leaders demand certainty which is not available This book redefines the nature of modern business In contrast to recent trends it has a focus on human centred manufacturing and on decision making which goes beyond a focus on short term profit The liberal capitalism of the USA and the UK is not the only current variety of capitalism Business is not just about managers but requires participation and engagement by workers Since the financial crash of 2008 there has been much talk about the need for fresh approaches to business but little has changed This book pulls together current research and practice and poses new questions based on case studies There is no one simple best way but an uncertain future can be addressed drawing on diverse past experience and cases The book addresses an intended audience in business and universities including business schools around the world The debate takes a broader approach involving research in the social sciences and approaches from philosophy The world has always been unpredictable but we have allowed ourselves to be comforted by convenient myths It is time to wake up

Gaming at the Edge Adrienne Shaw,2015-01-01 Video games have long been seen as the exclusive territory of young heterosexual white

males In a media landscape dominated by such gamers players who do not fit this mold including women people of color and LGBT people are often brutalized in forums and in public channels in online play Discussion of representation of such groups in games has frequently been limited and cursory In contrast Gaming at the Edge builds on feminist queer and postcolonial theories of identity and draws on qualitative audience research methods to make sense of how representation comes to matter In Gaming at the Edge Adrienne Shaw argues that video game players experience race gender and sexuality concurrently She asks How do players identify with characters How do they separate identification and interactivity What is the role of fantasy in representation What is the importance of understanding market logic In addressing these questions Shaw reveals how representation comes to matter to participants and offers a perceptive consideration of the high stakes in politics of representation debates Putting forth a framework for talking about representation difference and diversity in an era in which user generated content individualized media consumption and the blurring of producer consumer roles has lessened the utility of traditional models of media representation analysis Shaw finds new insight on the edge of media consumption with the invisible marginalized gamers who are surprising in both their numbers and their influence in mainstream gamer culture

Conceptions in the Code Stefan Larsson,2017-01-02 Stefan Larsson s Conceptions in the Code makes a significant contribution to sociolegal analysis

representing a valuable contribution to conceptual metaphor theory By utilising the case of copyright in a digital context it explains the role that metaphor plays when the law is dealing with technological change displaying both conceptual path dependence as well as what is called non legislative developments in the law The overall analysis draws from conceptual studies of property in intellectual property By using Karl Renner s account of property Larsson demonstrates how the property regime of copyright is the projection of an older regime of control onto a new set of digital social relations Further through an analysis of the concept of copy in copyright as well as the metaphorical battle of defining the BitTorrent site The Pirate Bay in the Swedish court case with its founders Larsson shows the historical and embodied dependence of digital phenomena in law and thereby how normative aspects of the source concept also stains the target domain The book also draws from empirical studies on file sharing and historical expressions of the conceptualisation of law revealing both the cultural bias of both file sharing and law Also law is thereby shown to be largely depending on metaphors and embodiment to be reified and understood The contribution is relevant for the conceptual and regulatory struggles of a multitude of contemporary socio digital phenomena in addition to copyright and file sharing including big data and the oft praised openness of digital innovation *Popular Geopolitics and Nation Branding in the Post-Soviet Realm* Robert A.
