s problemático a medida que las diferentes ciencias de lo humano nos hacen tomar conciencia de nuestra radical complejidad y problematicidad. Si a esto se unen las múltiples dimensiones y facetas que nos constituyen la complejidad nos lleva también a reafirmar nuestra singularidad. El empeño del autor de este libro Antropología filosófica Dimensiones de la realidad humana continuación de su anterior texto Antropología filosófica Nosotros urdimbre solidaria y responsable 1999 se orienta a indagar lo que nos convierte en singulares interpretando las aportaciones de las ciencias de lo humano desde el horizonte crítico de la filosofía así como desde la coimplicación de las diversas dimensiones de nuestra realidad. Se trata de un completo manual resultado de una dilatada experiencia académica en el que se pretende conjugar y complementar la perspectiva científica y filosófica desde el horizonte de un ideal o modelo antropológico que resalta la dimensión unitaria de lo humano unidad biocultural y psicosomáticas así como su radical condición social y solidaria simbólica utópica y abierta al misterio esto es a la pregunta por el fundamento último de la realidad.

El ateísmo científico Carlos Javier Alonso, 2015-12-27 La superación del reduccionismo científico pretende ser un diagnóstico crítico del pensamiento contemporáneo que presenta entre otras patologías una fuerte indigestión de cientificismo ampliamente difundido de mil modos en la opinión pública mediante revistas de divulgación científica libros de texto exposiciones etc. Por cientificismo debemos entender la teoría en virtud de la cual los únicos conocimientos válidos son los que proporcionan las ciencias preferentemente las ciencias experimentales y la investigación científica basta para satisfacer las necesidades de la inteligencia humana y para resolver todos nuestros problemas realmente significativos. El cientificismo constituye pues una absolutización de la ciencia una restricción injustificada del saber humano que no es exclusivamente de carácter científico es en otras palabras la ideología de quienes piensan que la ciencia lo es todo o al menos el medio principal de que disponemos para saberlo todo. La obra comienza con un examen de las formas de saber humano ordinaria científica filosófica y religiosa enseguida centra su análisis en la historia del cientificismo desde sus albores con la filosofía atomista griega hasta nuestros días. En la época contemporánea se exploran con detenimiento los tipos de cientificismo más relevantes el fisicalismo el biologismo el antropologismo el socialismo científico el psicologismo freudiano y el materialismo cibernético. La indagación se extiende también al pensamiento de los principales exponentes del cientificismo contemporáneo Monod Sagan Rostand Morin Lorenz Dawkins Davies Atkins y Hawking. Finalmente se acomete el estudio del estado actual del cientificismo así como su necesaria superación una superación no sólo a la ciencia sino también indispensable para alcanzar una imagen del mundo y del hombre objetiva ponderada y real. Carlos Javier Alonso es Doctor en Filosofía y Licenciado en Filología Hispánica. Entre sus publicaciones destacan La agonía del cientificismo 1999 Historia básica de la ciencia 2001 y El evolucionismo y otros mitos.
