SUÁREZ OROZCO codirectores de uno de los mayores estudios longitudinales sobre niños y niñas inmigrantes y sus familias ofrecen una visión clara y profunda e interdisciplinaria de lo que está aconteciendo con estas personas y de cómo puede verse afectado su futuro Constatan los autores que para los hijos e hijas de inmigrantes este es el mejor y el peor de los momentos En la actualidad tienen mayores probabilidades que cualquier otra generación anterior de inmigrantes de acabar en universidades o sin estudios en libertad o en la circunstancia La mayoría llega motivada para estudiar respetuosa con la autoridad y dispuesta a aprender el idioma del país de acogida Para alcanzar el éxito muchos de ellos se enfrentan a enormes obstáculos derivados de la pobreza los prejuicios el mismo trauma de la inmigración y su encuentro con el mundo antiintelectual materialista y hedonista de muchos de sus compañeros nacidos en los países ricos de acogida Sus familias los trasladan con la esperanza de una vida mejor pero temen que se pierdan en la cultura callejera como ocurre con frecuencia Los autores describen con rigor cómo estos chicos y chicas configuran su identidad y qué acontece en su paso por el sistema educativo y con las relaciones sociales que establecen Los datos sobre su historia y vida cotidiana muestran también su relación ambivalente con el país de adopción

Teoría de las condiciones y los servicios generales de la producción Gustavo Garza, Jaime Sobrino, Normand Asuad, Carola

Conde,Conrado Jiménez,2013-06-17 La economía política de la urbanización asume que las condiciones generales de la producción constituyen el determinante histórico fundamental de la concentración espacial del capital. En este libro primero de una trilogía sobre el tema se extiende esa categoría proponiendo la existencia del binomio condiciones y servicios generales de la producción como un concepto más adecuado para comprender las aglomeraciones metropolitanas contemporáneas. En la primera parte de la obra se analiza la evolución de dicha categoría dentro de la teoría del capital y su desarrollo histórico mundial como andamiaje infraestructural así como su definición tipológica y características. En la segunda parte se inicia un estudio empírico sobre el vínculo de la infraestructura con la competitividad urbana y principalmente la cuestión de su financiamiento en el caso de la Ciudad de México.
