A Guide for the Dissection of the Dogfish (Squalus Acanthias) Lawrence Edmonds Griffin, 2019-12-16 In *A Guide for the Dissection of the Dogfish Squalus Acanthias* Lawrence Edmonds Griffin presents a meticulously crafted exploration of the anatomy of the dogfish using a clear and systematic approach that is both informative and instructive. The text is carefully structured to guide students and educators through the dissection process, combining rich descriptions with illustrative diagrams. Griffin's precise language and scientific rigor reflect the demands of early 20th century educational practices in zoology, positioning the work within the contextual framework of then contemporary biological study and pedagogy. Lawrence Edmonds Griffin was a noted zoologist and educator with a deep commitment to marine biology and a passion for making complex biological concepts accessible to students. His rich background in anatomical studies, paired with his firsthand experience in laboratory education, inspired him to provide an indispensable resource that equips learners with essential knowledge about the dogfish, a species representative of elasmobranch fish. Griffin's work is a testament to the educational philosophies of the period, emphasizing experiential learning through direct observation and practical application. Highly recommended for students, educators, and marine biology enthusiasts, Griffin's guide not only serves as a valuable resource for dissections but also enriches understanding of vertebrate anatomy within a broader ecological context. This book fosters an appreciation for marine life and invites readers to engage with the intricacies of biological science. *Guide to the Dissection of the Dog* Malcolm Eugene Miller, 1962
