Manual of Electrical Undertakings, 1927 *Asian Labor in the Wartime Japanese Empire* Paul H. Kratoska, 2014-12-18
During the Pacific War the Japanese government used a wide range of methods to recruit workers for construction projects throughout the occupied territories Mistreatment of workers was a major grievance both in widely publicized cases such as the use of prisoners of war and forced Asian labor to construct the Thailand Burma Death Railway and in a very large number of smaller projects In this book an international group of specialists on the Occupation period examine the labor needs and the recruitment and use of workers whether forced military or otherwise throughout the Japanese empire This is the first study to look at Japanese labor policies comparatively across all the occupied territories of Asia during the war years It also provides a graphic context for examining Japanese colonialism and relations between the Japanese and the people living in the various occupied territories Bayou Meto Basin General Reevaluation Report, 2006 **Journal of the United States Artillery**, 1914 Coconino National Forest (N.F.), Deep Lake Allotment, 2006 **Resource Selection by Animals** B.B. Manly, L. McDonald, D.L. Thomas, 2012-12-06 We have written this book as a guide to the design and analysis of field studies of resource selection concentrating primarily on statistical aspects of the comparison of the use and availability of resources of different types Our intended audience is field ecologists in general and wildlife biologists in particular who are attempting to measure the extent to which real animal populations are selective in their choice of food and habitat As such we have made no attempt to address those aspects of theoretical ecology that are concerned with how animals might choose their resources if they acted in an optimal manner The book is based on the concept of a resource selection function where this is a function of characteristics measured on resource units such that its value for a unit is proportional to the probability of that unit being used We argue that this concept leads to a unified theory for the analysis and interpretation of data on resource selection and can replace many ad hoc statistical methods that have been used in the past *Monthly Catalogue, United States Public Documents*, 1994 *Anesthesia Equipment E-Book* Jan Ehrenwerth, James B.
