The Vanishing Neighbor Marc J. Dunkelman, 2014-07-28 A sweeping new look at the unheralded transformation that is eroding the foundations of American exceptionalism Americans today find themselves mired in an era of uncertainty and frustration The nation's safety net is pulling apart under its own weight political compromise is viewed as a form of defeat and our faith in the enduring concept of American exceptionalism appears increasingly outdated But the American Age may not be ending In *The Vanishing Neighbor* Marc J Dunkelman identifies an epochal shift in the structure of American life a shift unnoticed by many Routines that once put doctors and lawyers in touch with grocers and plumbers interactions that encouraged debate and cultivated compromise have changed dramatically since the postwar era Both technology and the new routines of everyday life connect tight knit circles and expand the breadth of our social landscapes but they've sapped the commonplace incidental interactions that for centuries have built local communities and fostered healthy debate The disappearance of these once central relationships between people who are familiar but not close or friendly but not intimate lies at the root of America's economic woes and political gridlock The institutions that were erected to support what Tocqueville called the

township that unique locus of the power of citizens are failing because they haven't yet been molded to the realities of the new American community. It's time we moved beyond the debate over whether the changes being made to American life are good or bad and focus instead on understanding the tradeoffs. Our cities are less racially segregated than in decades past but we've become less cognizant of what's happening in the lives of people from different economic backgrounds, education levels or age groups. Familiar divisions have been replaced by cross-cutting networks with profound effects for the way we resolve conflicts, spur innovation and care for those in need. The good news is that the very transformation at the heart of our current anxiety holds the promise of more hope and prosperity than would have been possible under the old order. The Vanishing Neighbor argues persuasively that to win the future we need to adapt yesterday's institutions to the realities of the twenty-first century American community.

Sometimes those challenges can get the most out of us. Somehow amidst our troubles, whether big or small, God's always there for us. He takes tremendous pleasure giving us the necessary strength to get through them. By understanding we are in God's hands, we can more easily trust Him, knowing He'll give us strength to conquer those challenges. During difficult times, we always have a choice. You're in control and can make a difference. So why not let those unpleasant challenges go and let God help us get through them? Whatever challenges you're currently experiencing, give them to God and let Him run circles around them. Get ready to transform yourself as you take charge and open the floodgate to what God has in store for you.

Transnational Popular Psychology and the Global Self-Help Industry Daniel Nehring, Emmanuel Alvarado, Eric C. Hendriks, Dylan Kerrigan, 2016-04-08. Self-help books aim to empower their readers and deliver happiness and personal fulfilment, but do they really live up to this? This book offers a fresh perspective on self-help culture and popular psychology. Research on this subject matter has generally focused on the USA and the Global North. In contrast, this book explores the production, circulation and consumption of self-help books from an innovative transnational perspective. Case studies on Trinidad, Mexico, the People's Republic of China, the UK and the USA explore the roles which self-help's therapeutic narratives of self and social relationships play in the contemporary world. In this context, the book questions the extent to which self-help fulfils its promise of individual autonomy and contentment. At the same time, it addresses debates about contemporary political change under transnational processes of cultural standardization.
