John Glenn Jr Debriefed Debriefing Friendship:

John Glenn Jr--Debriefed John Glenn, Jr., 2016-03-13 On February 20 1962 John Glenn Jr became the first American to orbit the Earth and set the stage for all of NASA's future human spaceflight programs to orbit culminating in the landing on the Moon. Experiences that are taken for granted today were at the time revelations to NASA capturing his initial thoughts and observations was deemed critical. While onboard the rescue ship Noa and over the next two days on Grand Turk Glenn recorded his thoughts on a tape recorder and answered questions during a NASA debriefing. Beginning with a narrative account of the flight and covering a chronological review of the flight from pre launch entering the capsule through recovery Glenn relates his experiences during his three orbit flight as well as his training and the design of his pressure suit and capsule. These ultimately would be used to aid in the writing of the official NASA post launch report. Inside is his story told to us in his own words. Includes a number of rare photos including from the USS Noa. *Mercury Rising* Jeff Shesol, 2021-06-01 A riveting history of the epic orbital flight that put America back into the space race. If the United States couldn't catch up to the Soviets in space how could it compete with them on Earth? That was the question facing John F Kennedy at the height of the Cold War a perilous time when the Soviet Union built the wall in Berlin tested nuclear bombs more destructive than any in history and beat the United States to every major milestone in space. The race to the heavens seemed a race for survival and America was losing. On February 20 1962 when John Glenn blasted into orbit aboard Friendship 7 his mission was not only to circle the planet it was to calm the fears of the free world and renew America's sense of self belief. *Mercury Rising* recreates the tension and excitement of a flight that shifted the momentum of the space race and put the United States on the path to the moon. Drawing on new archival sources personal interviews and previously unpublished notes by Glenn himself *Mercury Rising* reveals how the astronaut's heroics lifted the nation's hopes in what Kennedy called the hour of maximum danger. **This New Ocean** Loyd S.
