

## SERVICE ENGINE

### Cleaning Air Intake Screen and Engine Fins

**IMPORTANT: Avoid damage!** The engine is air-cooled and requires a large amount of air intake when running. Reduced air intake can cause overheating.

- Keep air intake screen and cooling fins clean.
- Keep covers and screws in place.

1. Park machine safely. (See Parking Safety in the Safety Section), and lift hood.

2. Clean air intake screen (A), cooling fins and external surfaces (B), with rag, brush, vacuum or compressed air. (Lower Hood).

### Checking and Cleaning Air Cleaner Elements (Briggs and Stratton 16hp Engine)

1. Park machine safely and lift hood.

2. Unhook clasp (A) on both sides of cover and remove cover.

3. Inspect the foam pre-cleaner without removing it, if the foam pre-cleaner (B) is dirty:

- Remove it from the filter carefully, leaving the paper element in the air cleaner housing.
- Wash pre-cleaner in a solution of warm water and liquid detergent.
- Rinse pre-cleaner thoroughly. Squeeze out excess water in a dry cloth until pre-cleaner is completely dry.
- Put approximately 30 ml (1 oz.) of clean engine oil onto the pre-cleaner. Squeeze pre-cleaner to distribute the oil evenly. Squeeze out excess oil with a clean cloth.

**IMPORTANT: Avoid damage!** Oil and debris can enter the engine through a damaged filter element.

- DO NOT wash paper element.
- DO NOT attempt to clean paper element by tapping against another object.
- DO NOT use pressurized air to clean element.
- Replace element (C) if it is very dirty, damaged or the seal is cracked.

4. Inspect the paper filter element without removing it, if the paper filter element (C) is damaged or dirty:

- Remove knobs (D) and plate (E).
- Carefully remove the element from the air cleaner housing.

## SERVICE ENGINE

5. Clean air cleaner base very carefully, preventing any dirt from falling into carburetor.

6. Install new paper filter element, plate and knobs.
7. Install foam pre-cleaner on paper filter element.
8. Replace cover and attach clasp to body.

### Checking Spark Plugs

**CAUTION: Avoid injury!** Touching hot surfaces can burn skin. The engine and components will be hot if the engine has been running. Allow the engine to cool before servicing.

1. Park machine safely. (See Parking Safety in the Safety Section), and lift hood.

2. Disconnect spark plug wire (A).
3. Remove spark plugs.
4. Clean spark plugs carefully with a wire brush.
5. Inspect spark plugs for:
  - Cracked porcelain.
  - Pitted or damaged electrodes.
  - Other wear or damage.

**NOTE:** In Canada, replace spark plug with resistor plug only.

6. Replace spark plug(s) as necessary.

7. Check plug gap with a wire feeler gauge.

- Gap must be 1 mm (0.040 in).
- To change gap, move the outer electrode.

8. Install and tighten spark plugs to 20 ft-lb (13 N-m).
9. Connect spark plug wires and lower hood.

### Adjusting Carburetor

**NOTE:** Carburetor is calibrated by the engine manufacturer and is not adjustable.

If engine is operated at altitudes above 1000 or 3,000 ft, some carburetors may require a special high altitude main jet. See your John Deere dealer.

If engine is hard to start or runs rough, check the troubleshooting section of this manual.

Possible engine surging will occur at high throttle with transmission in "N" neutral and mower engagement lever disengaged. This is a normal condition due to the emission control system.

After performing the checks in the troubleshooting section and your engine is still not performing correctly, contact your John Deere dealer.
