

## BREAK-IN

Be sure that when an engine is returned to service after an overhaul, the owner is advised to follow break-in procedures exactly. See inside front cover and page 2-6 for correct fuel mixture.

For the first 5 to 10 minutes, operate engine at a fast idle. Check operation of water pump. For remainder of first hour, do not operate engine over 3000 rpm (approximate) or one-half throttle (approximate).

### NOTE

With easy planing boats, it would be desirable to bring the boat into planing position with full power and then immediately reduce the throttle setting to approximately 3000 rpm (one-half throttle). BE SURE boat maintains planing attitude at this throttle setting.

During second hour, bring boat into planing attitude and reduce power to 4000 rpm (approximate) or three-quarters throttle (approximate), while maintaining planing attitude. At intervals during the second hour, apply full power for periods of one to two minutes, returning throttle to original setting (4000 rpm - three-quarters throttle).

Avoid continuous full throttle operation for extended period during the next few hours.
