The NATO Intervention in Libya Kjell Engelbrekt, Marcus Mohlin, Charlotte Wagnsson, 2013-10-01 This book explores lessons learned from the military intervention in Libya by examining key aspects of the 2011 NATO campaign NATO s intervention in Libya had unique features rendering it unlikely to serve as a model for action in other situations There was an explicit UN Security Council mandate to use military force a strong European commitment to protect Libyan civilians Arab League political endorsement and American engagement in the critical initial phase of the air campaign Although the seven month intervention stretched NATO s ammunition stockpiles and political will almost to their respective breaking points the

definitive overthrow of the Gaddafi regime is universally regarded as a major accomplishment With contributions from a range of key thinkers and analysts in the field the book first explains the law and politics of the intervention starting out with deliberations in NATO and at the UN Security Council both noticeably influenced by the concept of a Responsibility to Protect R2P It then goes on to examine a wide set of military and auxiliary measures that governments and defence forces undertook in order to increasingly tilt the balance against the Gaddafi regime and to bring about an end to the conflict as well as to the intervention proper while striving to keep the number of NATO and civilian casualties to a minimum This book will be of interest to students of strategic studies history and war studies and IR in general *The Litigation Manual* ,1983

Computational Intelligence, III G. Valle,F. Gardin,N.

Cercone,1991-07-01 In recent years AI has been experiencing a deep internal debate on the appropriateness of the symbolic based paradigm and all of its consequences While various symbolic representation schemes as well as their integration have been proposed their limitations have continuously pushed researchers for improved versions or entirely new ones New viewpoints such as the complex dynamic based approach with neural nets can be regarded simply as new problem solving techniques with specific properties Under this perspective what seems to be important is the ability to combine heterogeneous representation and problem solving techniques Research on heterogeneous intelligent systems goes hand in hand with research on specific problem solving methods and paradigms therefore representing their conceptual and practical glueing element The papers contained in this proceedings are just one instance of such awareness activity in the international scientific community Spacing Law and Politics Leif Dahlberg,2016-04-20

Examining the inherent spatiality of law both theoretically and as social practice this book presents a genealogical account of the emergence and the development of the juridical In an analysis that stretches from ancient Greece through late antiquity and early modern and modern Europe and on to the contemporary courtroom it considers legal and philosophical texts artistic and literary works as well as judicial practices in order to elicit and document a series of critical moments in the history of juridical space Offering a more nuanced understanding of law than that found in traditional philosophical political or social accounts of legal history Dahlberg forges a critical account of the intimate relations between law and politics that shows how juridical space is determined and conditioned in ways that are integral to the very functioning and malfunctioning of law **Catalogue of**
