Biomechanics, Sensing and Bio-inspired Control in Rehabilitation and Wearable Robotics Wujing Cao,Zirui Lan, Ningbo Yu,Keyi Wang,Wenwei Yu,2024-12-11 Research on biomechanics sensing and bio inspired control is vital for progressing rehabilitation and wearable robotics Biomechanical simulation can provide the theoretical basis for device design and optimize the design and control scheme The fusion of bio signals neural signals and physical signals is helpful for accurate perception and recognition of human motion intention Bio inspired control is an important direction of individualized and efficient assistance of rehabilitation and wearable robotics In recent years with the development of biomedical and information technology the equipment used for information acquisition has been updated from cumbersome and immobile devices to small and portable ones making integration with rehabilitation and wearable robotics easier Moreover the performance of rehabilitation and wearable robotics can be quantified by changes in biomechanics and through the use of biosensors The proposed Research Topic invites theoretical and experimental research dealing with novel techniques for quantifying biomechanics sensing and bio inspired control in rehabilitation and wearable robotics For example the use of biologically inspired actuators no longer requires rigid supports as the skeletal system can be used to that end the application of synergies or motor primitives has led to a reduction in the number of actuators or to improve their control The latest advances in modeling and simulation made it possible to assess and control fatigue or simulate using such devices outside of a clinical environment These research achievements enable a new generation of rehabilitation and wearable robotics

Textbook of Dr. Vodder's Manual Lymph Drainage Günther Wittlinger, Hildegard Wittlinger, 2004 Manual Lymph Drainage MLD first introduced in 1936 by Drs Emil and Estrid Vodder of Denmark is a procedure which stimulates the lymphatic circulation with slow circular and careful pumping massage movements of the hand and the thumb The thin lymph vessels run through the body tissue like a drainage system which transports the lymphatic fluid via large collecting vessels the lymph nodes on to the blood circulation Manual Lymph Drainage has especially proven its worth in the case of a congestion of the lymphatic flow This is often the result of postoperative abdominal surgery and surgical treatment of breast carcinoma It is only with this smooth and harmonic form of massage that the lymphatic flow is stimulated in the sensitive lymph capillaries Painful swelling is removed and healing is encouraged This volume contains all the subject matter of the basic course and has proven its worth for many years Hildegard Wittlinger is the director of the Dr Vodder School in Walchsee Austria and has taught the MLD technique throughout the world since 1972

 When Dr Vodder discovered the undividable teamwork between the immune system and the lymphatic system around 1930

he also came to the conclusion that there had to be a connection between the lymphatic system and the detoxification of the brain Without having reliable scientific proof available Dr Vodder developed a manual treatment protocol to stimulate the lymph flow including inner mouth drainage which he presented at a medical conference in Paris France in 1935 Manual lymphatic drainage has been taught and applied throughout Europe ever since with great success for various ailments Thanks to Dr Jonathan Kipnis director of the Center for Brain Immunology and Glia at the University of Virginia who recently came across the scientific evidence of how the lymphatic brain detoxification is accomplished which is basically via lymph capillaries piggybacking on the back of the ophthalmic and olfactory nerves By simply applying a full body manual lymphatic drainage the average speed of lymph flow is temporarily increased by 20 percent Despite all technological accomplishments in medicine the importance of the lymphatic system has been broadly overlooked Because we are surrounded by chemicals most of them toxic I will explain how important a well functioning lymphatic system is for maintaining overall health
