The book illustrates the development of HWI conceptualization theory and research. It deals with the foremost HWI subtype of workaholism. However, it also compares workaholism as a negative HWI subtype with work devotion, passion, and engagement as a positive HWI subtype. Most importantly, it addresses HWI in general, including its possible situational subtypes. In view of Snir and Harpaz's claim that the study of situational heavy work investors is relatively scarce, this certainly constitutes a promising step in the right direction. Finally, it deals with timely and important topics examined by prominent international researchers on Heavy Work Investment and such issues as personality factors of workaholism, work-life balance, cross-cultural similarities and differences in HWI, work addiction, and technology, HWI and retirement, and intergenerational similarity in work investment.
