 developments in computer science data mining and big data analytics have resulted in new operational frameworks in
 agriculture food and the environment which in fact share a strong link between them A key challenge for researchers is to
 extract new data patterns and utilize them in decision making Managers policy makers and practitioners have to be aware of
 these methodologies in order to establish efficient and effective working groups for the tasks to be resolved The book reviews
 the complexity of the interrelationship between agriculture food production and processing and environmental issues It also
 highlights the prospects of modeling in various cases of problem solving in these sectors and reviews the new and future
 challenges Consumer awareness in food production and processing practices is continually increasing and the necessity for
 advanced behavioural tools follows the same trend Furthermore the value chain management challenge is becoming one of
 the most crucial tasks due to the increased importance of new parameters like the origin of products its environmental
 footprint and the enhancement of local production etc The book addresses these topics in a holistic approach merging
 modeling with advanced marketing practices in a coherent and innovative manner being an effective tool in a continuously
 demanding world **Livestock Farming** ,1981
