Gupta, Soroosh Sorooshian, Alain N. Rousseau, Richard Turcotte, 2003-01-10 Published by the American Geophysical Union as part of the Water Science and Application Series Volume 6 During the past four decades computer based mathematical models of watershed hydrology have been widely used for a variety of applications including hydrologic forecasting hydrologic design and water resources management These models are based on general mathematical descriptions of the watershed processes that transform natural forcing e g rainfall over the landscape into response e g runoff in the rivers The user of a watershed hydrology model must specify the model parameters before the model is able to properly simulate the watershed behavior **Ecological Processes Handbook** Luca Palmeri, Alberto Barausse, Sven Erik Jorgensen, 2013-08-28 Ecology is a cross disciplinary field involving many different aspects of science Written with this in mind this book introduces ecological processes ranging from physical processes to chemical processes and biological processes It contains all the necessary information on an ecological process a clear detailed but not too lengthy definition some practical examples the main mathematical models which have been used to describe the process and the key interconnections with other ecological processes that must be known in order to apply what has been learned from the book Geographic Information Systems in Water Resources Engineering Lynn E. Johnson, 2016-04-19 State of the art GIS spatial data management and analysis tools are revolutionizing the field of water resource engineering Familiarity with these technologies is now a prerequisite for success in engineers and planners efforts to create a reliable infrastructure GIS in Water Resource Engineering presents a review of the concepts and application *Evaporation and Evapotranspiration* Wossenu Abtew, Assefa Melesse, 2012-08-28 The book is a thorough presentation of theoretical and applied aspects of the evaporation and evapotranspiration process supported by data from experimental studies It is written in a way that the theoretical background of evaporation and evapotranspiration estimation is presented in a simplified manner comprehensive to most technical readers The book deals with details of meteorological parameters and monitoring sensors which are needed for estimating evaporation and evapotranspiration Errors in meteorological parameter measurements are also presented Estimation errors strengths weaknesses and applicability of a wide range of evaporation and evapotranspiration estimation methods are presented along with samples of application to a certain region Application of newer simpler methods is presented A new technology remote sensing application to evaporation and evapotranspiration estimation is presented The latest interest in the subject climate change and evapotranspiration is presented in the last chapter This book will be

beneficial to students hydrologists engineers meteorologists water managers and others Evapotranspiration Ayse Irmak,2012-01-18 This edition of Evapotranspiration Remote Sensing and Modeling contains 23 chapters related to the modeling and simulation of evapotranspiration ET and remote sensing based energy balance determination of ET These areas are at the forefront of technologies that quantify the highly spatial ET from the Earth s surface The topics describe mechanics of ET simulation from partially vegetated surfaces and stomatal conductance behavior of natural and agricultural ecosystems Estimation methods that use weather based methods soil water balance the Complementary Relationship the Hargreaves and other temperature radiation based methods and Fuzzy Probabilistic calculations are described A critical review describes methods used in hydrological models Applications describe ET patterns in alpine catchments under water shortage for irrigated systems under climate change and for grasslands and pastures Remote sensing based approaches include Landsat and MODIS satellite based energy balance and the common process models SEBAL METRIC and S SEBS Recommended guidelines for applying operational satellite based energy balance models and for overcoming common challenges are made **Management of Water Use in Agriculture** Kenneth K.
