Summary of What Every BODY is Saying Alexander Cooper, 2021-10-03 Summary of What Every BODY is Saying One of the most influential communication methods we use in our daily interactions is our nonverbal or body language It is the kind of communication that ignites the emotions and reactions of our intestinal level Research has shown that understanding body language increases your ability to achieve anything you want in a given situation To improve body language and project an open presence eye contact is the key Eye interaction is one of the most vital means of communication Using direct eye contact while interacting with others can change the way people see them When people begin to speak directly in the eyes of a person they are considered safe reliable and capable Hand gestures and facial expressions are the second levels of change that can be visualized with an open presence These communication methods are ideal for improving the ability to communicate clearly and effectively The skillful use of open hand movements and the expressive effect of the face produce a greater impact when speaking visually stimulating the listener and increasing the amount of information provided during the interaction Even when we are children they teach us that good children are sitting correctly with their legs together and hands crossed in front of them The stimulus to limit physical space such as children can produce some of the characteristics found in the body language of adult presence To counteract this effect one can begin to assume the characteristics of the open presence body language and integrate those paths into their natural state of being Upon completing this change in behavior the same impressions and nonverbal messages as the open presence counterparts will be displayed We could spend years learning and developing effective body language skills with such an important skill The fact is that most people underestimate the importance of body language until they seek a better understanding of human behavior in a personal relationship or gain an advantage in a highly competitive business situation The mastery of body language allows people to interpret the meaning behind certain gestures and body movements and to understand how messages can be projected and effectively communicated when dealing with others As a result the overall

effectiveness of interpersonal relationships has increased considerably The type of closed spoken body language is described in people who bend the body around the midline of the body which extends from the top of the head to the feet directly towards the center of the body The physical qualities that create this type of presence are the feet very close together the arms close to the body the hands crossed or joined in front of the body the small movements of the hands the shoulders forward and the eyes concentrated at eye level Here is a Preview of What You Will Get A Full Book Summary An Analysis Fun quizzes Quiz Answers Etc Get a copy of this summary and learn about the book *What Every BODY is Saying* Joe Navarro, Marvin Karlins, 2009-10-13 OVER 1 MILLION COPIES SOLD Joe Navarro a former FBI counterintelligence officer and a recognized expert on nonverbal behavior explains how to speed read people decode sentiments and behaviors avoid hidden pitfalls and look for deceptive behaviors You ll also learn how your body language can influence what your boss family friends and strangers think of you Read this book and send your nonverbal intelligence soaring You will discover The ancient survival instincts that drive body language Why the face is the least likely place to gauge a person s true feelings What thumbs feet and eyelids reveal about moods and motives The most powerful behaviors that reveal our confidence and true sentiments Simple nonverbals that instantly establish trust Simple nonverbals that instantly communicate authority Filled with examples from Navarro s professional experience this definitive book offers a powerful new way to navigate your world

The Human Sensor Project: Restoring Intuition in Law Enforcement Sherridean Abddeen,2025-08-24 I didn t write this book because I had spare time I wrote it because I watched something sacred disappear from our field instinct There was a time before the screens and the server rooms before the tech obsession when we trained officers to feel first observe without aid and make a call based on presence not permission You walked into an inspection and you just knew You couldn t explain it The bag looked fine The documents matched The traveler smiled But something in your gut whispered Look again And back then We taught that We honored it We trained young recruits to trust that inner ping not override it because a computer said no match found But over time we traded instinct for instruction sets We replaced human eyes with code And now we have officers who know how to swipe a badge and wait for a green screen but panic the moment the system goes down

misinformation has its roots in earlier techniques mass social engineering of the early twentieth century and interpersonal hacker social engineering of the 1970s converging today into what they call masspersonal social engineering As Gehl and Lawson trace contemporary manipulative communication back to earlier forms of social engineering possibilities for amelioration become clearer The authors show how specific manipulative communication practices are a mixture of information gathering deception and truth indifferent statements all with the instrumental goal of getting people to take actions the social engineer wants them to Yet the term fake news they claim reduces everything to a true false binary that fails to encompass the complexity of manipulative communication or to map onto many of its practices They pay special attention to concepts and terms used by hacker social engineers including the hacker concept of bullshitting which the authors describe as a truth indifferent mix of deception accuracy and sociability They conclude with recommendations for how society can undermine masspersonal social engineering and move toward healthier democratic deliberation
