Joel Sternfeld Joel Sternfeld, 2006-08-01 It is a dream we have all cherished at least fleetingly the hope of finding a place in this world in which to live more simply surrounded by beauty and like minded people Photographer Joel Sternfeld's new book *Sweet Earth Experimental Utopias in America* explores the past and present of these idealized communities across the United States

**Joel Sternfeld: Sweet Earth**, 2024-02-06 As laissez faire market forces sweep the globe and the earth's future seems endangered the dream of living in concert with nature and with one another is increasingly essential A common human longing throughout history the utopian community ideal has taken root firmly in America over the past 200 years In *Sweet Earth Experimental Utopias in America* Joel Sternfeld looks at 60 representative historic or present American utopias Neither a conventional history nor a conventional book of photography *Sweet Earth* brings together what might otherwise seem disparate individualized social phenomena and makes visible the community of communities This tradition of thinking has ancient universal precedents When Thomas More wrote *Utopia* in 1516 he gave a name to an idea that had included the Epic of Gilgamesh Plato's Republic and the Old Testament's and he started an argument Francis Bacon who believed in utopia through science and Jean Jacques Rousseau utopia through nature soon joined the debate but it was the harsh changes in daily life engendered by the factory systems of the early Industrial Revolution that brought an urgency to the discussion as seen in the writings of David Owens Karl Marx and Friedrich Engels While the early social theorists were largely European it was in the fluid environment of young America that true utopian communities were built and utopian experimentation flourished In the years between 1810 and 1850 hundreds of secular and religious societies bravely tried to build a perfect life for their members In the twentieth century experimentation began again reaching a fever pitch in the turbulent days of the Vietnam War Some of the late 1960s communes still survive and continue to flourish The 1990s and the early years of the new millennium have become yet another hotbed of social experimentation The co housing movement is sweeping America with at least 70 communities fully completed and occupied and numerous others planned At the same time the rapid global expansion of sustainable communities known as ecovillages has been widely adopted in America This book by one of America's foremost artists includes a photograph of each community and is accompanied by brief text that summarizes the most salient aspects of the history or organization A book that functions both as art as well as a hopeful guide to alternative ways of life

The Experimenters Eva Díaz, 2014-12-25 In the years immediately following World War II Black Mountain College an unaccredited school in rural Appalachia became a vital hub of cultural innovation Practically every major artistic figure of the mid twentieth century spent some time there Merce Cunningham Ray Johnson Franz Kline Willem and Elaine de Kooning Robert Motherwell Robert Rauschenberg Dorothea Rockburne Aaron Siskind Cy Twombly the list goes on and on Yet scholars have tended to view these artists' time at the College as little more than prologue a step on their way to greatness With *The Experimenters* Eva Díaz reveals the importance of Black Mountain College and especially of

three key teachers Josef Albers John Cage and R Buckminster Fuller to be much greater than that Daz's focus is on experimentation Albers Cage and Fuller she shows taught new models of art making that favored testing procedures rather than personal expression These methodologies represented incipient directions for postwar art practice elements of which would be sampled and often wholly adopted by Black Mountain students and subsequent practitioners The resulting works which interrelate art and life in a way that imbues these projects with crucial relevance not only reconfigured the relationships among chance order and design they helped redefine what artistic practice was and could be for future generations Offering a bold compelling new angle on some of the most widely studied creative figures of modern times The Experimenters does nothing less than rewrite the story of art in the mid twentieth century **American Photo - ND**

,2007-01 **Utopian Mirage** Mary-Kay Lombino,Vassar College. Frances Lehman Loeb Art Center,2007 *New York's New Edge* David Halle,Elisabeth Tiso,2014-12-09 The story of New York's west side no longer stars the Sharks and the Jets Instead it's a story of urban transformation cultural shifts and an expanding contemporary art scene The Chelsea Gallery District has become New York's most dominant neighborhood for contemporary art and the streets of the west side are filled with gallery owners art collectors and tourists Developments like the High Line historical preservation projects like the Gansevoort Market the Chelsea galleries and plans for megaprojects like the Hudson Yards Development have redefined what is now being called the Far West Side of Manhattan David Halle and Elisabeth Tiso offer a deep analysis of the transforming district in New York's New Edge and the result is a new understanding of how we perceive and interpret culture and the city in New York's gallery district From individual interviews with gallery owners to the behind the scenes politics of preservation initiatives and megaprojects the book provides an in depth account of the developments obstacles successes and failures of the area and the factors that have contributed to them Art in America Frank Jewett

,2005 **Photography and Failure** Kris Belden-Adams,2020-08-06 Throughout photography s history failure has played an essential recurring part in the development and perceived value of this medium Exploring a range of failures individual and institutional technological and historiographical Photography and Failure asks what it means to fail and considers how this narrative of failure has shaped our understanding of photography From the trial and error beginnings of photochemistry to poor business decisions influenced by fickle public opinion and taste the founders and early practitioners of photography frequently faced bankruptcy and ignominy Alongside these individual failures this collection of essays examines the role of museums in rediscovering preserving and presenting photographs within institutions as well as technological limitations such as the problematic panoramic lens or the digital archival failures of Snapchat Moving beyond the physical photograph and these processes the book also investigates the limitations of photographs themselves as purveyors of truth time space documentary realism and social change whether these failures are used to effect or not Finally the book probes the historiographical failures affecting the discipline drawing on key debates such as the perceived over emphasis on European and American photography and the place of photography theory in contemporary art practice Blurring the boundaries between traditional binaries of art and non art photography amateur and professional practice and individual and corporate perspectives Photography and Failure presents a new approach to understanding and evaluating photographic history
