Memory and Movies John G. Seamon, 2015 How popular films from Memento to Slumdog Millionaire can help us understand how memory works In the movie Slumdog Millionaire the childhood memories of a young game show contestant trigger his correct answers In Memento the amnesiac hero uses tattoos as memory aids In Away from Her an older woman suffering from dementia no longer remembers who her husband is These are compelling films that tell affecting stories about the human condition But what can these movies teach us about memory In this book John Seamon shows how examining the treatment of memory in popular movies can shed new light on how human memory works After explaining that memory is actually a diverse collection of independent systems Seamon uses examples from movies to offer an accessible nontechnical description of what science knows about memory function and dysfunction In a series of lively encounters with numerous popular films he draws on Life of Pi and Avatar for example to explain working memory used for short term retention He describes the process of long term memory with examples from such films as Cast Away and Groundhog Day The Return of Martin Guerre among other movies informs his account of how we recognize people the effect of emotion on autobiographical memory is illustrated by The Kite Runner Titanic and other films movies including Born on the Fourth of July and Rachel Getting Married illustrate the complex pain of traumatic memories Seamon shows us that movies rarely get amnesia right often using strategically

timed blows to the protagonist's head as a way to turn memory off and then on again as in *Desperately Seeking Susan*. Finally he uses movies including *On Golden Pond* and *Amour* to describe the memory loss that often accompanies aging while highlighting effective ways to maintain memory function.

Memory and Movies John Seamon, 2024-10-29 How popular films from *Memento* to *Slumdog Millionaire* can help us understand how memory works. In the movie *Slumdog Millionaire* the childhood memories of a young game show contestant trigger his correct answers. In *Memento* the amnesiac hero uses tattoos as memory aids. In *Away from Her* an older woman suffering from dementia no longer remembers who her husband is. These are compelling films that tell affecting stories about the human condition. But what can these movies teach us about memory? In this book John Seamon shows how examining the treatment of memory in popular movies can shed new light on how human memory works. After explaining that memory is actually a diverse collection of independent systems, Seamon uses examples from movies to offer an accessible nontechnical description of what science knows about memory function and dysfunction. In a series of lively encounters with numerous popular films he draws on *Life of Pi* and *Avatar* for example to explain working memory used for short term retention. He describes the process of long term memory with examples from such films as *Cast Away* and *Groundhog Day*. The Return of Martin Guerre among other movies informs his account of how we recognize people. The effect of emotion on autobiographical memory is illustrated by *The Kite Runner*, *Titanic* and other films. Movies including *Born on the Fourth of July* and *Rachel Getting Married* illustrate the complex pain of traumatic memories. Seamon shows us that movies rarely get amnesia right, often using strategically timed blows to the protagonist's head as a way to turn memory off and then on again as in *Desperately Seeking Susan*. Finally he uses movies including *On Golden Pond* and *Amour* to describe the memory loss that often accompanies aging while highlighting effective ways to maintain memory function.

Popular Myths about Memory, Brian H. Bornstein, 2017-07-03 Misconceptions about memory phenomena often go hand in hand with popular misrepresentations of its function in media. In *Popular Myths about Memory* Brian H. Bornstein examines how the representation of memory in novels, movies and television shows often clashes with scientific research. Bornstein discusses the consequences of these myths on the popular understanding of memory and its functions. Depictions of amnesia, eyewitness accounts and superior memory are just a few of the processes explored and debunked. This book is recommended for scholars interested in psychology, media and film studies, literary studies and communication studies.

Asian American Film Festivals Erin Franziska Högerle, 2020-10-26 Responding to a lack of studies on the film festival's role in the production of cultural memory, this book explores different parameters through which film festivals shape our reception and memories of films. By focusing on two Asian American film festivals, this book analyzes the frames of memory that festivals create for their films, constructed through and circulated by the various festival media. It further establishes that festival locations, both cities and screening venues, play a significant role in shaping our experience of films. Finally, it shows that festivals produce performances which help guide audiences towards certain readings and direct

the film's role as a memory object Bringing together film festival studies and memory studies Asian American Film Festivals offers a mixed methods approach with which to explore the film festival phenomenon thus shedding light on the complex dynamics of frames locations and performances shaping the festival's memory practices It also draws attention to the understudied genre of Asian American film festivals showing how these festivals actively engage in constructing and performing a minority group's collective identity and memory

Performing Brains on Screen Fernando

Vidal, 2025-10-01 Performing Brains on Screen deals with film enactments and representations of the belief that human beings are essentially their brains a belief that embodies one of the most influential modern ways of understanding the human Films have performed brains in two chief ways by turning physical brains into protagonists as in the brain movies of the 1950s which show terrestrial or extra terrestrial disembodied brains carrying out their evil intentions or by giving brains that remain unseen inside someone's head an explicitly major role as in brain transplantation films or their successors since the 1980s in which brain contents are transferred and manipulated by means of information technology Through an analysis of filmic genres and particular movies Performing Brains on Screen documents this neglected filmic universe and demonstrates how the cinema has functioned as a cultural space where a core notion of the contemporary world has been rehearsed and problematized
