Dumbing Us Down John Taylor Gatto,1992 Gatto reveals the deadening heart of compulsory state schooling assumptions and structures that stamp out the self knowledge curiosity concentration and solitude essential to learning In his 26 years of award winning teaching in New York City s public schools Gatto has found that independent study community service large doses of solitude and apprenticeships with adults of all walks of life are the keys to helping children break the thrall of our conforming society Gatto urges all of us to find ways to reengage children and families in actively controlling our culture economy and society

Weapons of Mass Instruction John Taylor Gatto,2010-04-01 The transformation of schooling from a twelve year jail sentence to freedom to learn John Taylor Gatto s Weapons of Mass Instruction now available in paperback focuses on mechanisms of traditional education which cripple imagination discourage critical thinking and create a false view of learning as a byproduct of rote memorization drills Gatto s earlier book Dumbing Us Down introduced the now famous expression of the title into the common vernacular Weapons of Mass Instruction adds another chilling metaphor to the brief against conventional schooling Gatto demonstrates that the harm school inflicts is rational and deliberate The real function of pedagogy he argues is to render the common population manageable To that end young people must be conditioned to rely upon experts to remain divided from natural alliances and to accept disconnections from their own lived experiences They must at all costs be discouraged from developing self reliance and independence Escaping this trap requires a strategy Gatto calls open source learning which imposes no artificial divisions between learning and life Through this alternative approach our children can avoid being indoctrinated only then can they achieve self knowledge good judgment and courage

Free School Teaching Kristan Accles Morrison,2012-02-01 Free School Teaching is the personal and professional journey of one teacher within the American educational system Faced with mounting frustrations in her own traditional middle school classroom and having little success in resolving them Kristan Accles Morrison decided to seek out answers first by immersing herself in the academic literature of critical education theory and then by turning to the field While the literature on progressive education gave her hope that things could be different and better for students locked into America s traditional education system she wanted to find a firsthand example of how these ideas played out in practice Morrison found a radical free school in Albany New York that embodied the ideas found in the literature and over a period of three months she observed and documented differences between alternative and traditional schools In trying to reconcile the gap between those systems Morrison details the lessons she learned about teachers students curriculum and the entire conception of why we educate our children

Unschooled Kerry McDonald,Peter Gray,2019-05-07 Education has become synonymous with schooling but it doesn t have to be As schooling becomes increasingly standardized and test driven occupying more of childhood than ever before parents and educators are questioning the role of schooling in society Many are now exploring and creating alternatives In a compelling narrative that introduces historical and contemporary research on self directed education *Unschooled* also spotlights how a diverse group of individuals and organizations are evolving an old schooling model of education These innovators challenge the myth that children need to be taught in order to learn They are parents who saw firsthand how schooling can dull children s natural curiosity and exuberance and others who decided early on to enable their children to learn without school Educators who left public school classrooms discuss launching self directed learning centers to allow young people s innate learning instincts to flourish and entrepreneurs explore their disillusionment with the teach and test approach of traditional schooling

Teen 2.0 Robert Epstein,2010-02-24 National Indie Excellence Awards first prize in the Parenting and Family category Arguing that adolescence is an unnecessary period of life that people are better off without this groundbreaking study shows that teen confusion and hardships are caused by outmoded systems that were designed to destroy the continuum between childhood and adulthood Documenting how teens are isolated from adults and are forced to look to their media dominated peers for knowledge this discussion contends that by infantilizing young people society does irrevocable harm to their development and well being Instead parents teachers employers and others must rediscover the adults in young people by giving them authority and responsibility as soon as they exhibit readiness Teens are

highly capable in some ways more than adults and this landmark discussion offers paths for reaching and enhancing the competence in America's youth

BRING UP KINGS BENEDICK GANZO, After years of public school teaching parenthood his experience as student himself and research on education and child development Benedick Ganzo has come up with an educational philosophy that will help you guide your children's full development through self-determinate education which he proves to be the way we humans were being educated since we first set foot on earth up to the time when schools were first set up in the last two hundred years to fill the need for manual labor when learning became more synthetic and boring restraining potentially talented masters and kings of their disciplines and making them mediocre or average at best He shows why the present school system poses more risk to the development of the child against the minimal advantage it could provide He explains why moving away from standardization or a general curriculum is the first step in improving education and at the same time making it cheaper for governments to operate Before we the governments implement school reforms he offers ways on how we might find ways to get the benefit of schools without letting it ruin our children In the end whether homeschooling unschooling or attending regular schools he presents strategies on how children could develop their full potential through the educational philosophy that he believes was more suited for us human beings which could have also been adapted by our schools had John Dewey prevailed over the Thorndikian factory modeled schools Through this book Benedick Ganzo has shown that we cannot just leave our children to schools and expect that someday after going through the Department mandated list of competencies they would already become the best version of themselves even in the company of well intentioned teachers who are obediently following orders from a central Department This is a must read for all teachers parents single mothers or fathers who will not settle for what is second best for their children Your parenting skills in the education department would be enriched by knowing the educational philosophy of self-determinate education which is the ancient way and the only way desirable for humans for millions of years before the advent of the reality detached factory modeled schools

The Divide Taylor Dotson, 2021-08-03 Why our obsession with truth the idea that some undeniable truth will make politics unnecessary is driving our political polarization In *The Divide* Taylor Dotson argues provocatively that what drives political polarization is not our disregard for facts in a post truth era but rather our obsession with truth The idea that some undeniable truth will make politics unnecessary Dotson says is damaging democracy We think that appealing to facts or common sense or nature or the market will resolve political disputes We view our opponents as ignorant corrupt or brainwashed Dotson argues that we don't need to agree with everyone or force everyone to agree with us we just need to be civil enough to practice effective politics Dotson shows that we are misguided to pine for a lost age of respect for expertise For one thing such an age never happened For another people cannot be made into ultra rational Vulcans Dotson offers a road map to guide both citizens and policy makers in rethinking and refashioning political interactions to be more productive To avoid the trap of divisive and fanatical certitude we must stop idealizing expert knowledge and romanticizing common sense He outlines strategies for making political disputes more productive admitting uncertainty sharing experiences and tolerating and negotiating disagreement He suggests reforms to political practices and processes adjustments to media systems and dramatic changes to schooling childhood the workplace and other institutions Productive and intelligent politics is not a product of embracing truth Dotson argues but of adopting a pluralistic democratic process
