The European Superpower John McCormick, 2006-11-14 In this important new book John McCormick argues that the EU has become an economic and political superpower whose new global role calls into doubt most of the recent assessments of unipolarity in world politics and American empire In his inimitably clear and accessible style McCormick shows how the rise of Europe has been underplayed because of traditional notions of power politics based on military might which he argues are much less relevant than in the past

European Disintegration? Douglas Webber, 2018-11-20 This new book provides a comprehensive analysis of Europe on the brink of political disintegration Observers of the European Union EU could be forgiven for thinking that it is in a state of permanent crisis The Union has been beset with high levels of Eurozone debt Russian intervention and armed conflict in Ukraine refugees fleeing conflict zones in North Africa and the Middle East and the decision of Britain to leave the European Union This text offers a concise and readable assessment of the dynamics character and consequences of these four crises and the increasingly real possibility of European disintegration High levels of socio economic interdependence and institutionalization have failed to result in an ever closer union and yet the proposed theories of disintegration also fall short Webber instead shows that it is only by looking at the role of the EU s dominant member Germany in each crisis that the potential for an increasingly fragmented Europe becomes clear Until now Germany has been

the EU's stabilizing force but this is no longer guaranteed. The fate of the integration process will depend on whether other more inclusive forms of stabilizing leadership may emerge to fill the vacuum created by Berlin's incapacity. This text is the ideal companion for upper undergraduate and postgraduate students of the European Union as part of degrees in politics, international relations or European studies or for anyone interested in the crises of the European Union.

Economic and Monetary Union Michele Chang, 2016-07-29. This accessible introductory text provides a comprehensive and accessible account of the evolution of the Eurozone from its beginnings in fixed exchange rate systems through to the aftermath of the sovereign debt crisis. It examines why the EMU was created, what went wrong to bring about the global financial crisis and why countries were affected so differently. It assesses the impact of monetary union both in Europe and beyond and evaluates the prospects for the Euro as an international currency. Recognising that political union has long been seen as part of monetary integration and that Eurozone membership often impacts domestic policy, Chang widens the scope of her evaluation to include effects and developments that are not purely economic in scope. Using theories drawn from economics and political science, this book provides students with an up-to-date analysis of the recent reforms undertaken, grounded in a long-term perspective of the trajectory of European integration. As well as suiting upper-level undergraduate and Master's courses on European Monetary Union, this text is beneficial for students of Politics, International Relations and European Studies on more general courses to foster an understanding of the impact of the EMU on the wider functioning of the EU. The text is filled with figures, maps, timelines and other pedagogical features to ensure this topic is accessible to students of all levels.

The European Council Wolfgang Wessels, 2015-09-29. This systematic assessment of the often opaque European Council looks at its characteristics, leaders and output as well as its impact on EU supranational and intergovernmental dynamics. Taking account of historical and contemporary developments up to and beyond the Lisbon Treaty, it encourages in-depth understanding of this key institution.

The European Commission Neill Nugent, Mark Rhinard, 2015-10-26. The European Commission is at the very heart of the European integration process and with the Council is one of the two central institutions of the European Union. Its activist role under Jacques Delors led to a dramatic increase in its activity and influence and contributed to a crisis of confidence in its effectiveness and its lack of adequate financial controls which culminated in the resignation of the entire Commission under Jacques Santer in 1999. What progress has the Commission made in addressing these issues under Romano Prodi? What are its prospects in face of the new challenges of Eastward enlargement? How great is its influence and how does this vary according to issues and circumstances? What are the implications of its hybrid character as a political and administrative body? How much has the Commission changed over time and how much and how does it need to change now? Written by a leading authority and author of the best-selling introductory text on the EU, this major new text provides the definitive introduction to and assessment of the Commission: its evolution, composition, organisation, character, functioning and role. Comprehensive, up-to-date and based on extensive original research.
