experiences including those described by the great mystics like Francis of Assisi Catherine of Siena and Teresa of Avila into natural or psychopathological categories such as hysteria hallucination delusion epileptic seizures psychosis the workings of the unconscious mind or fraud Are such reductionist explanations valid Over the past three decades the Medjugorje visionaries have been subjected to extensive medical psychological and scientific examination even while undergoing their visionary experiences Daniel Klimek argues that the case of Medjugorje affords a rare opportunity to understand a deeper dimension of extraordinary religious phenomena Presenting and analyzing the scientific studies on the visionaries in juxtaposition with the major scholars and debates surrounding religious experience Klimek concludes that a multidisciplinary approach grants a more holistic and deeper understanding of such extraordinary religious experiences **Religious Books,**

Ferguson,2018-02-28 The world contrary to popular understanding is not less religious but in many ways more religious than ever Two issues seem to be emerging in this resurgence One is the need for a spiritual center that gives integration a sense of inner peace ethical guidance and meaning and direction in life It is present in most of the world s great religious traditions and present elsewhere as humans seek to find their way in a confusing conflicted and rapidly changing world Accompanying this quest for a deeper spirituality is the God question and a desire to understand the divine in new ways that match a contemporary worldview This book *Mindful Spirituality* invites the reader to find a thoughtful credible and satisfying way to address these two major concerns While starting within a Christian frame of reference the book is not exclusive but ecumenical and interfaith in spirit It is especially helpful to those with no set spiritual pathway and those
