Prototype on Passive Solar Heating and Natural Cooling of Buildings, 1990 **A Genealogy of Tropical Architecture** Jiat-Hwee Chang, 2016-04-28 A Genealogy of Tropical Architecture traces the origins of tropical architecture to nineteenth century British colonial architectural knowledge and practices It uncovers how systematic knowledge and practices on building and environmental technologies in the tropics were linked to military technologies medical theories and sanitary practices and were manifested in colonial building types such as military barracks hospitals and housing It also explores the various ways these colonial knowledge and practices shaped post war techno scientific research and education in climatic design and modern tropical architecture Drawing on the interdisciplinary scholarships on postcolonial studies science studies and environmental history Jiat Hwee Chang argues that tropical architecture was inextricably entangled with the socio cultural constructions of tropical nature and the politics of colonial governance and postcolonial development in the British colonial and post colonial networks By bringing to light new historical materials through formidable research and tracing the history of tropical architecture beyond what is widely considered today as its founding moment in the mid twentieth century this important and original book revises our understanding of colonial built environment It also provides a new historical framework that significantly bears upon contemporary concerns with climatic design and sustainable architecture This book is an essential resource for understanding tropical architecture and its various contemporary manifestations Its in depth discussion and path breaking insights will be invaluable to specialists academics students and practitioners Design and Construction of Bioclimatic Wooden Greenhouses, Volume 1 Gian Luca Brunetti, 2023-01-25 This book is the first of four dealing with bioclimatic design and construction by focusing on the most basic and polyvalent of modern environmental systems the bioclimatic greenhouse the Swiss army chainsaw of architecture More specifically this first volume focuses on preliminary bioclimatic design of greenhouses laying down fundamental principles that are also likely to be invaluable in designing in more general terms bioclimatic and low energy architecture with low environmental impact This multi volume book covers both free standing greenhouses that can naturally heat and cool themselves and lean to greenhouses that

support the natural heating and cooling of buildings this includes both agricultural greenhouses and greenhouses suited to host people As a result it is a trans disciplinary work deriving its areas of concern from a broad range of study areas spanning from environmental to constructional to structural drawing the clarity of the approach from the fact that the topics are presented by a single author with a single voice and a designer s mindset To achieve this the book adopts a composite set of explanatory strategies and communication registers including extensive support by 3D construction drawings and examples and presents not only state of the art solutions but also experimental ones

Passive and Low Energy Ecotechniques Arthur Bowen, Simos Yannas, 2013-09-03 Passive and Low Energy Ecotechniques PLEA presents the proceedings of the Third International PLEA Conference held in Mexico City Mexico on August 6 11 1984 The book includes papers on state of the art selected topics aimed at providing a basic knowledge country and regional or personal monographs to continue the exchange of national information which is an established feature of PLEA and position papers for the topic seminars The text also presents papers on vernacular shelter and settlement case studies of new buildings and retrofits urban and community planning and design photovoltaic systems implementation cooling systems modeling and simulation guidelines and tools for design and planning

Designing for Zero Waste Steffen Lehmann, Robert Crocker, 2013-07-03 Designing for Zero Waste is a timely topical and necessary publication Materials and resources are being depleted at an accelerating speed and rising consumption trends across the globe have placed material efficiency waste reduction and recycling at the centre of many government policy agendas giving them an unprecedented urgency While there has been a considerable literature addressing consumption and waste reduction from different disciplinary perspectives the complex nature of the problem requires an increasing degree of interdisciplinarity Resource recovery and the optimisation of material flow can only be achieved alongside and through behaviour change to reduce the creation of material waste and wasteful consumption This book aims to develop a more robust understanding of the links between lifestyle consumption technologies and urban development

Architecture and Energy William Braham, Daniel Willis, 2013-07-18 Does energy consumption influence architectural style Should more energy efficient buildings look different Can that look be used to explain or enhance their performance Architecture and Energy provides architects and architectural theorists with more durable arguments for environmental design decisions arguments addressing three different scales or aspects of contemporary construction By drawing together essays from the leading experts in the field this book engages with crucial issues in sustainable design such as The larger role of energy in forming the cultural and economic systems in which architecture is conceived constructed and evaluated The different measures and meanings of energy performance and how those measures are realized in buildings The specific ways in which energy use translates into the visible aspects of architectural style Drawing on research from the UK US Europe and Asia the book outlines the problems surrounding energy and architecture and provides the reader with a considered overview of this important topic
