Gratitude Oliver Sacks:

Gratitude Oliver Sacks, 2015-11-24 A deeply moving testimony and celebration of how to embrace life In January 2015 Oliver Sacks was diagnosed with a recurrence of cancer and he shared this news in a New York Times essay that inspired readers all over the world I cannot pretend I am without fear But my predominant feeling is one of gratitude Above all I have been a sentient being a thinking animal on this beautiful planet and that in itself has been an enormous privilege and adventure Gratitude consists of four essays that originally appeared in The New York Times accompanied by a foreword that describes the occasion of each chapter The foreword is written by Billy Hayes Oliver Sacks's partner and Kate Edgar his long time collaborator

Gratitude Oliver Sacks, 2015-11-24 A deeply moving testimony and celebration of how to embrace life No writer has succeeded in capturing the medical and human drama of illness as honestly and as eloquently as Oliver Sacks During the last few months of his life he wrote a set of essays in which he movingly explored his feelings about completing a life and coming to terms with his own death A series of heart rending yet ultimately uplifting essays A lasting gift to readers The Washington Post It is the fate of every human being Sacks writes to be a unique individual to find his own path to live his own life to die his own death Together these four essays form an ode to the uniqueness of each human being and to gratitude for the gift of life My predominant feeling is one of gratitude I have loved and been loved I have been given much and I have given something in return Above all I have been a sentient being a thinking animal on this beautiful planet and that in itself has been an enormous privilege and adventure Oliver Sacks Oliver Sacks was like no other clinician or writer He was drawn to the homes of the sick the institutions of the most frail and disabled the company of the unusual and the abnormal He wanted to see humanity in its many variants and to do so in his own almost anachronistic way face to face over time away from our burgeoning apparatus of computers and algorithms And through his writing he showed us what he saw Atul Gawande author of Being Mortal

some degree an act of creation and every act of memory is to some degree an act of imagination If a man has lost a leg or an eye he knows he has lost a leg or an eye but if he has lost a self himself he cannot know it because he is no longer there to know it My religion is nature That s what arouses those feelings of wonder and mysticism and gratitude in me Music can lift us out of depression or move us to tears it is a remedy a tonic orange juice for the ear But for many of my neurological patients music is even more it can provide access even when no medication can to movement to speech to life For them music is not a luxury but a necessity We speak not only to tell other people what we think but to tell ourselves what we think Speech is a part of thought Language that most human invention can enable what in principle should not be possible It can allow all of us even the congenitally blind to see with another person s eyes No Self No Problem: How Neuropsychology

Is Catching Up to Buddhism Chris Niebauer,2024-09-18 HAS SCIENCE CONFIRMED WHAT THE BUDDHA ALREADY KNEW In this groundbreaking book neuropsychology professor Chris Niebauer explains how after decades of research on the brain Western science may have inadvertently confirmed a fundamental tenet of Buddhism anatta or the doctrine of no self Niebauer shows how findings in neuropsychology suggest that our sense of self is actually an illusion created by the left side of the brain and that it exists in the same way a mirage in the middle of the desert exists as a thought rather than a thing

This incredible thesis has significant and wide ranging implications in psychology philosophy religion and personal growth Not content to merely detail how this radical new yet ancient perspective could change our view of the world and what it means to be human Niebauer also offers a range of intriguing exercises at the end of each chapter that will allow you to experience this truth for yourself Read this book and you will never view self help the same way again Teacher

Cosgrove,2019-03-21 The brain with its nearly one hundred billion neurons is the most complex structure in the universe and we are living in a period of revolutionary advancements in neuroscience Yet scientists and skeptics often frame these findings in ways that challenge the Christian worldview Many professionals and popularizers claim that human beings are their brains and that all human behavior and experience are merely by products of brain physiology In The Brain the Mind and the Person Within professor of psychology Mark Cosgrove not only explains what the brain is and what it does but also corrects common

misinterpretations and demonstrates that what we know about the brain coheres with the teachings of Scripture. He contends that humans are unities of soul and body in which both the spiritual and the physical interact. From this perspective, he presents informative overviews of contemporary debates about the brain, including consciousness, free will, God, personhood, and life after death. The better we understand the brain, the better we understand ourselves and our exquisite design that reflects the wisdom of the Creator. Thoughtful readers will find this to be a fascinating, accessible survey of this unique part of the body and the profound theological and technological issues surrounding it.
