Development Banks and Sustainability in the Andean Amazon Rebecca Ray, Kevin P. Gallagher, Cynthia A. Sanborn, 2019-10-10 This book explores what development banks governments and communities have learned in the last decade of careful negotiation

between social and environmental protections in the Andean Amazon and the pressures of a surging infrastructure and development boom. While mega dams, highways, and ports are filling up the pipelines of planners, the national governments of Andean and Amazon basin countries and major development banks have enacted ambitious social and environmental protections. The book traces the development of social and environmental protections after years of struggle by affected communities going beyond official policies to discover how these reforms work in practice and ultimately whether they are enough to stem the risks of infrastructure mega projects. As Chinese public banks play an increasingly important role in the region, the book also demonstrates that there is a risk of governments undercutting their own standards. By contrast, this book shows that making infrastructure work for everyone involved requires mutually reinforcing networks of support and accountability among communities, governments, and development banks. This book, led by an expert, multi-disciplinary international team, will be of considerable interest to researchers in the fields of development and development economics, geography, anthropology, and ecology, as well as practitioners in development banks and in government regulatory and foreign aid agencies.

Sustainable Adaptation to Climate Change Katrina Brown, Eriksen Siri, 2012-06-25. This book sets out how to ensure that adaptation efforts are socially and environmentally sustainable, contributing to poverty reduction as well as confronting the processes driving vulnerability. Over 100bn a year is pledged to help finance adaptation projects via the Climate Adaptation Fund. These projects and their funding played a central role in the latest climate talks in Cancun, Mexico, ensuring that adaptation to climate change will be an international priority over the next few decades. Many existing adaptation projects are, however, not environmentally or socially sustainable. Adaptation projects that focus on reducing specific climate sensitivities can even, if bringing benefits adversely affect vulnerable groups and create social inequity or even unintentionally undermine environmental integrity. **Sustainable Adaptation to Climate Change** examines how adaptation to climate change, types of measures, policy frameworks, and local household strategies interact with social and environmental sustainability. A mixture of conceptual and case study based papers draw on research from Europe, Asia, and Africa. It will be of interest to all researchers and policymakers in climate change adaptation and development. **Business**

and Sustainable Development in Africa Uwafiokun Idemudia, Francis Xavier Dery Tuokuu, Tahiru Azaaviele Liedong, 2022-03-30. The book offers new critical insights into the relationship between corporate social responsibility (CSR) and sustainable development in Africa. The extent to which CSR initiatives can contribute to sustainable development in Africa remains debatable. This book examines in a very clear structure how, when, and whether CSR initiatives are able to contribute to the realization of the sustainable development goals: peace and environmental sustainability at the micro levels of society. It also explores some macro-level issues such as the relationship between taxation and CSR, CSR and human rights, and CSR and public governance, and in so doing challenges existing CSR dogmas. With themes aligned with the UN Sustainable Development Goals (SDGs), this book provides useful practical guidance for policymakers and business leaders.

seeking to better understand the strength and limitations of CSR as a vehicle for advancing sustainable development in Africa It will also appeal to scholars researchers and students of African studies development studies international business strategic management and business and society Sustainable Development Elohimjl,Elmar A.
