

An Introduction to Protocols for Occupational Therapy

Inga Warren

The use of protocols for clarifying thinking and promoting occupational therapy is described, drawing on personal experience. Potential applications and methods of presentation are outlined and illustrated.

Introduction

A protocol is a working document, a draft, formula or record, which can be used to clarify ideas, plans and processes. An appropriate definition of a protocol is 'a statement reporting an observation exactly and without attempting an interpretation'.¹ A protocol describes but does not discuss. Occupational therapy protocols state what occupational therapy does or intends to do in given situations. They can be used for service planning and negotiating for resources, setting standards, research, education and training, and role definition.

Potential applications

Service planning

When planning services, intentions can be explained by drafting concise information about what will be done, to whom, by whom and how. This document can then be used to present proposals when seeking approval for service developments, or negotiating resources or contracts of service. It may later be used as a framework for planning individual treatments.

The author designed a protocol for occupational therapy with high risk infants admitted to a special care baby unit (SCBU). The project was new and without precedent. The protocol stated objectives, aims, criteria for referral, intended interventions, and skills needed (Table 1). References to appropriate research and publications were included. This was submitted to the paediatrician who discussed it with key members of staff and agreement that the project should go ahead was reached. The service was implemented in accordance with the protocol, which was updated to take into account increased skills, changes in unit structure and the results of evaluation.

In another example, a protocol was used as the foundation for planning a new elderly care service as part of a hospital complex. In this case, a protocol stating priority goals, preferred locations for interventions, staff numbers and grades was presented to help plan facilities and bids for continuing funds (Table 2). A concise, clearly laid out written statement of what the occupational therapy service intends is essential when bidding for space, funding or representation or when resisting service cuts.

Setting standards

Protocols can be used to define what is acceptable practice in an occupational therapy department given available resources. Similarly, they can be used to illustrate the effect of changes

in resources, structures or other services. They can also be used to compare practices. For example, two protocols for the rehabilitation of amputee patients were prepared. One described the existing service while the other proposed an improved service which would result from earlier referral. These were used to convince surgeons of the advantages of preoperative referral.

Table 1. Text format (widely used by the author and applied to SCBU project)

Objectives:	State main purpose of programme.
Aims:	State how you intend to meet the objectives.
Referral:	State criteria for referring patients/clients to the programme and method of referral.
Assessment:	State screening and assessment tools to be used.
Interventions:	State treatment techniques to be used and methods of delivery (for example, direct or indirect).
Discontinuation:	State criteria for discontinuing intervention.
Locations:	State where intervention will take place.
Liaison:	State other disciplines or agencies who will collaborate.
Skills required:	State specialised skills required by the therapist and related training needs.
References:	List supporting research.

Group Protocol Occupational Therapy Example:

Occupational Therapy and Mental Health Jennifer Creek, Lesley Lougher, 2011-11-29 This book is a comprehensive textbook for occupational therapy students and occupational therapists working in the field of mental health. It presents different theories and approaches, outlines the occupational therapy process, discusses the context of practice, and describes a wide range of techniques used by occupational therapists. These include physical activity, cognitive approaches, group work, creative activities, play, and life skills. The book covers all areas of practice in the field, including mental health promotion, acute psychiatry, community work, severe and enduring mental illness, working with older people, child and adolescent mental health, forensic occupational therapy, substance misuse, and working with people on the margins of society. The theory chapters are written by occupational therapists who are recognised experts in their fields, and the applied chapters are written by practitioners. An innovation in this edition is the inclusion of commentaries by service users on some of the chapters. This fourth edition has been extensively revised and updated. The new structure reflects changes in service delivery and includes sections on philosophy and theory, base the occupational therapy process, ensuring quality, the context of occupational therapy, occupations, client groups. Important new areas that are covered include mental health promotion, evidence-based practice, community development, and continuing professional development. Addresses the needs of the undergraduate course, covers all the student needs for this subject area in one volume. Links between theory and practice are reinforced throughout. Written by a team of experienced OT teachers and practitioners. Comprehensive, covers theory, skills, and applications, as well as management. The clear structure, with the division of chapters into six distinct sections, makes it easy to learn and revise from, as well as easy to refer to for quick reference in the clinical situation. Provides key reading and reference lists to encourage and facilitate more in-depth study on any aspect. It is written in a style that is easy to read and understand, yet there is enough depth to take students through to their final year of education. Chapters on the application of occupational therapy are written by practising clinicians, so they are up to date and realistic. For qualified occupational therapists, the book includes a review of current theories and approaches to practice, with references so that they can follow up topics of particular interest. Suitable for BSc and BSc Hons occupational therapy courses.

Group Dynamics in Occupational Therapy Marilyn B. Cole, 2025-02-25 This best-selling textbook, now in its Sixth Edition, provides the essential strategies and tools that occupational therapists need to design and organize client groups for enhanced theory-based therapeutic interventions for physical, mental health, and wellness populations. Updated in line with AOTA's latest Occupational Therapy Practice Framework, the book is split into three sections. Section I introduces author Marilyn Cole's 7-step format for group leadership, the cornerstone for the rest of the book. This is followed by chapters on the fundamentals of group dynamics, client-centered groups, and issues around diversity, inclusion, and cultural humility. Section II provides an overview of a range of theoretical approaches to group work, from psychodynamic, biomechanical, behavioral, cognitive,

developmental sensory and occupation based models Section III focuses on design of group protocols synthesizing the theories activities or modalities leadership and membership selection guidelines Revisions include guidelines for using a client centered group approach with marginalized populations as well as designing occupational therapy groups with wellness and non traditional populations for student service learning in the community Thoroughly updated throughout and with new case studies drawn from a range of disciplines this is an essential resource for any student or practitioner in the field of occupational therapy Occupational Analysis and Group Process Jane Clifford O'Brien, Jean W.
