Mobile and Personal Satellite Communications 3 Marina Ruggieri, 2012-12-06 This book of Proceedings contains papers of the Third European Workshop on Mobile Personal Satcoms EMPS 98 held in Venice Italy November 1998 For the third time EMPS has given to the experts an opportunity for exchanging opinions and novel ideas in the exciting field of mobile and personal satellite communications As with the 1996 edition EMPS 98 issued a formal call for papers gathering a large number of contributions from many different countries Each submitted paper has been reviewed by international referees and finally selected by the Workshop Steering Committee WSC Furthermore key topics in the field of mobile personal satcoms have also been focused on through a few invited papers As EMPS has been conceived to gather trends and novelties in the field of mobile personal satcoms it is tightly matched to the natural evolution of the field itself In this frame the reader will notice how the dominant topics are related to system and network issues while a very little number of contributions have been provided in the propagation and channel related areas This represents a natural trend of a field where deep efforts have been paid in the past years to understanding and modelling the physical layer and where the present interest is mostly migrating to the applications Further changes and novelties may be envisaged in the future of this field I believe that EMPS will continue to represent an effective opportunity to catch and understand more deeply this evolution
