Grassroots Elections in China Kevin O'Brien, Suisheng Zhao, 2014-07-22 Twenty years after the launch of village elections the time is ripe to assess the progress and impact of China's most notable political reform Where have elections been conducted well and where have they been conducted poorly How have procedures changed over the years and have elections truly transformed how power is exercised in the countryside What methods are researchers employing to study elections and how have scholars from different disciplines contributed to our knowledge of grassroots politics in China This book carefully examines the implementation and effects of China's village township and people's congress elections both in terms of democratizing the polity and spurring other changes in state society relations The chapters in this book have been published across several issues of the Journal of Contemporary China

Grass-Roots Democracy in India and China Manoranjan Mohanty, 2007-01-12 In both India and China economic reforms have generated challenges for local institutions This book studies the political experiences in India and China from an interdisciplinary perspective It examines the process of democratisation highlighting the demands for participation and the power structures interjecting them

Inklings of Democracy in China Suzanne Ogden, 2020-05-11 Since 1979 China's leaders have introduced economic and political reforms that have lessened the state's hold over the lives of ordinary citizens By examining the growth in individual rights the public sphere democratic processes and pluralization the author seeks to answer questions concerning the relevance of liberal democratic ideas for China and the relationship between a democratic political culture and a democratic political system The author also looks at the contradictory impulses and negative consequences for democracy generated by economic liberalism Unresolved issues concerning the relationships among culture democracy and socioeconomic development are at the heart of the analysis Nonideological criteria are used to assess the success of the Chinese approach to building a fair just and decent society

Chinese Politics in the Hu Jintao Era: New Leaders, New Challenges Willy Lam, 2016-07-01 Drawing on hundreds of interviews with top Chinese officials parliamentarians scholars and businessmen Willy Lam a renowned journalist and writer on Chinese affairs presents a first hand multi dimensional account of twenty first century China and the impact of fourth generation leaders including President Hu Jintao and Premier Wen Jiabao Lam goes behind the glitzy facade of nouveau riche Beijing and Shanghai to examine how the Hu leadership has tried to extend the Communist Party's mandate of heaven by tackling an array of daunting problems the weakening legitimacy of the Party's leadership restless peasants angry workers political stagnation over the lack of reform foreign relations difficulties unreliable energy supplies resurgent nationalism and the increasingly dubious Chinese model of development The author assesses possible contributions that the new classes of private businessmen professionals and intellectuals as well as new ideas such as nationalism globalization and federalism will make to economic prosperity and political liberalization The book also includes a chapter on foreign policy which contains an insightful account of Beijing's evolving and sometimes difficult relations with the United States Europe

Japan and other major countries and blocs as well as the role of the People's Liberation Army **Regeneration of Peasants** Shukai Zhao, 2017-02-13 This book focuses on analyzing the inter relationship between Chinese peasants and the reform and it tries to understand the conditions of peasants during the course of the Chinese social transition This book argues that Chinese peasants are the most important force that keeps the reform going More importantly this book argues that this force comes from the peasants pursuit of their own social political and economic interest not some spontaneous demand for reform itself This inherent relationship between the peasants and the reform is summarized into five major relationships the inter relationship between peasants and the central government between peasants and local government between peasants and rural democratization between peasants and social constructions and between peasants and local officials These five inter relationships are the prime mechanism for the interaction between Chinese peasants and the reform and these forms the basis for understanding and analyzing the inter relationship between the state and peasants

Electoral Justice and Political Culture Dai zhicheng, 2021-12-15 The election process reflects the essence of the electoral system The justice of the electoral process can best reflect whether the electoral system is legitimate and democratic The democratic and legal shortcomings of China's electoral system can be solved by rationalizing and democratizing the electoral process which is consistent with the realization of justice under the electoral process In this book procedural justice is combined with the electoral process to find the conditions and elements needed to achieve more justice in elections The electoral system is still based on the political will of the political party to rule and the electoral system itself has serious legislative problems which shows that the foundation of China's electoral system has problems Then China's electoral system cannot truly represent the political voices and political interests of the people in the implementation and at the same time cannot reflect the fairness of the election in the electoral procedure and the determination of the election results The People's Congress system and the Political Consultation system simply cannot elect the right representatives who truly represent the interests of the people The elected government and state power organs are separated from the people's political status political interests and development interests in the operation of their duties and the exercise of power By analyzing the problems in China's electoral system and election procedures the book concludes the conditions for the realization of more justice rationalization and democratization of China's electoral system and election procedures through procedural justice The spiritual connotation of procedural justice under the electoral system and election procedures are combined with the traditional Chinese democratic political culture to construct an electoral political culture adapted to the contemporary Chinese political environment advancing the development of procedural justice in China's electoral system to realize the rationality legitimacy and democracy of elections *Tax Reform in Rural China* Hiroki Takeuchi, 2014-08-11 How does China maintain authoritarian rule while it is committed to market oriented economic reforms This book analyzes this puzzle by offering a systematic analysis of the central local governmental relationship in rural China focusing on rural

taxation and political participation Drawing on in depth interviews with Chinese local officials and villagers and combining them with game theoretic analyses it argues that the central government uses local governments as a target of blame for the problems that the central government has actually created The most recent rural tax reforms which began in 2000 were a conscious trade off between fiscal crises and rural instability For the central government local fiscal crises and the lack of public goods in agricultural areas were less serious concerns than the heavy financial burdens imposed on farmers and the rural unrest that the predatory extractive behavior of local governments had generated in the 1990s which threatened both economic reforms and authoritarian rule

New Dynamics in East Asian Politics Zhiquan Zhu,2012-02-02 Using a comparative and thematic approach this textbook looks at key aspects of the new dynamics in East Asian politics security political economy and society

China's Authoritarian Path to Development Liang Tang,2017-06-14 This book examines the various stages of China's development in the economic social and political fields relating theories and models of development to what is actually occurring in China and discussing how China's development is likely to progress going forward It argues that China's modernization hitherto can be characterized as authoritarian development a fusion of mixed economic institutions of varying types of ownership with social stability and political cohesiveness and that the present phase where more emphasis is being given to social issues is likely to lead on to a new phase where a more mature civil society and a more extensive middle class are likely to look for greater democratization It presents an in depth analysis of China's changing social structure and civil society explores the forces for and processes of democratization and assesses the prospects for further democratization in the light of changing social structures

Democratic Transitions Sujian Guo,Gary A Stradiotto,2014-04-03 Democratic transitions have occurred in many countries in various regions across the globe such as Southern Europe Latin America Africa East and Southeast Asia Eastern Europe and the Middle East and these nations have undergone simultaneously political economic and social transformations Yet the patterns and characteristics of transitions have varied significantly and different modes of transition have resulted in different outcomes This book offers cross national comparisons of democratic transition since the turn of the twentieth century and asks what makes democracies succeed or fail In doing so it explores the influence the mode of transition has on the longevity or durability of the democracy by theoretically examining and quantitatively testing this relationship The authors argue that the mode of transition directly impacts the success and failure of democracy and suggest that cooperative transitions where opposition groups work together with incumbent elites to peacefully transition the state result in democracies that last longer and are associated with higher measures of democratic quality Based on a cross national

dataset of all democratic transitioning states since 1900 this book will be of great interest to students and scholars of international politics comparative politics and democracy and democratization studies

The Failure of China's Democratic Reforms Zaijun Yuan, 2011-12-08 In its propaganda the Chinese Communist Party does not deny the value of democracy but it insists that democracy in China can be only socialist democracy with Chinese characteristics The most essential nature of such democracy is that it is under the single party system and it excludes multi party politics and competitive elections In recent years Chinese democracy has won more support because of achievements the party has made in developing economy This raises a question does this efficient authoritarian political system in China even if it is not democratic deserve applause because it can facilitate economic development The party also insists that it is democratic But is the party's theory of democracy compatible with western democracy Since 1998 the party has organized some political reforms such as direct elections for township executives direct elections for township party secretaries township party congress reform and deliberative democracy experiments while maintaining single party politics In the party's propaganda some of these reforms have become party achievements in improving socialist democracy with Chinese characteristics In addition to these four kinds of party organized reforms another reform originated from the grassroots the participation of independent candidates in a few local people's congress elections This book examines these five local political reforms It demonstrates that the four reforms instigated and organized by the party were tightly controlled and manipulated by the party Although some reform measures may possibly liberalize parts of China's political mechanism it is highly unlikely that the four reforms will eventually lead to political democratization in China In the fifth reform which was motivated from outside the bureaucratic system the party took drastic measures to repress the political participation of grassroots power As a result nearly all independent candidates in the local people's congress elections failed in their attempts to gain office The prospects for this reform are also poor The book argues that all five reforms have failed and that none will lead to China's democratization in the near future The book concludes that the party's authoritarian regime in China is by nature anti democratic and that so called socialist democracy with Chinese characteristics is not democratic
