Gravity: from Falling Apples to Supermassive Black Holes Nicholas Mee, 2023-02-02 Gravity From Falling Apples to Supermassive Black Holes provides a fascinating historical account of how we have reached our current understanding of gravity and places the most sensational developments in gravitational physics including the detection of gravitational waves and supermassive black holes in their true context The Return of Nature John Sallis, 2016-09-30 A reflection on the urgent need for a new philosophical understanding of and relationship with nature John Sallis dismantles the traditional conception of nature in this book of imagination and the cosmos In the thought of Emerson Hegel and Schelling Sallis discerns the seeds of an understanding of nature that goes against the modern technological assault on natural things and opens a space for a revitalized approach to the world He identifies two fundamental reorientations that philosophical thought is called on to address today the turn to the elemental in nature and the turn from nature to the cosmos at large He traces the elusive course of the imagination as if coming from nowhere and describes the way in which it bears on the relation of humans to nature Sallis's account demonstrates that a renewal of our understanding of nature is one of the prime imperatives we demand from philosophy today Inspiring for anyone looking to open up their mind to the reflection on other ways to live more closely in tune with their own nature and to the nature that is around them Phenomenological Reviews

Some Antipodean Musings of An Octogenarian Pom Ignatius Gee, 2023-12-08 When the author reached the age of eighty and was no longer able to travel much he began to put a few words on paper his motivation was to keep his mind alert as his muscles weakened Some of these musings attempted to be amusing without much success Others were reactions to articles in the Australian newspaper in the days when he could afford to have it delivered every day Then he got carried away and began to deliberately wear different hats a sportswriter one day a current affairs commentator on another day an arrogant book reviewer the next All the opinions expressed are his own based upon wide reading and a good memory so that ideas spawned by a book on theoretical physics began to mix with stories of the Brith Raj in India And his sound Catholic upbringing based on his father s love of Rerum Novarum began to embrace the results of living for a while in a strongly Buddhist society So if you are looking for historical accuracy you will not find it here he has kept no notes or references what is in his head has leaked out through his word processor It is curiously therapeutic a bit like going to Confession but not quite
