Great Powers And Geopolitical Change:

Great Powers and Geopolitical Change Jakub J. Grygiel, 2006 Named by Foreign Affairs as a book to read on geopolitics In an era of high technology and instant communication the role of geography in the formation of strategy and politics in international relations can be undervalued But the mountains of Afghanistan and the scorching sand storms of Iraq have provided stark reminders that geographical realities continue to have a profound impact on the success of military campaigns Here political scientist Jakub J Grygiel brings to light the importance of incorporating geography into grand strategy He argues that states can increase and maintain their position of power by pursuing a geostrategy that focuses on control of resources and lines of communication Grygiel examines case studies of Venice the Ottoman Empire and China in the global fifteenth century all great powers that faced a dramatic change in geopolitics when new routes and continents were discovered The location of resources the layout of trade networks and the stability of state boundaries played a large role in the success or failure of these three powers Grygiel asserts that though many other aspects of foreign policy have changed throughout history strategic response to geographical features remains one of the most salient factors in establishing and maintaining power in the international arena

The New Continentalism Kent E. Calder, 2012-04-24 In this groundbreaking book Kent E Calder argues that a new transnational configuration is emerging in Asia driven by economic growth rising energy demand and the erosion of longstanding geopolitical divisions What Calder calls the New Silk Road with a strengthening multi faceted relationship between East Asia and the Middle East at its core could eventually emerge as one of the world s most important multilateral

configurations Straddling the border between comparative politics and international relations theory this important book will stimulate debate and discussion in both fields

Beyond Energy Jacopo Maria Pepe,2017-11-22 Jacopo Maria Pepe examines the rapid development of non energy transport infrastructure in the broader Eurasian space By doing so the author considers the ongoing structural transformation of the Eurasian continent against the backdrop of deepening commercial interconnectivity in Eurasia into broader areas of trade supported by the rapid development of rail connectivity He frames this process in a long wave historical analysis and considers in detail the geopolitical geo economic and theoretical implications of deepening physical connectivity for the relationships among China Russia Central Asia and the European Union

Strategy in the Contemporary World John Baylis,James J. Wirtz,Colin S. Gray,2016 This book offers a comprehensive introduction to the role of military power in today s world It explores both the enduring and historical issues which have shaped the study of strategy and the contemporary issues that dominate today s headlines

The Obama Doctrine Colin Dueck,2015-04-01 By mid 2015 the Obama presidency will be entering its final stages and the race among the successors in both parties will be well underway And while experts have already formed a provisional understanding of the Obama administration s foreign policy goals the shape of the Obama Doctrine is finally coming into full view It has been consistently cautious since Obama was inaugurated in 2009 but recent events in the Middle East Eastern Europe and the Far East have led an increasingly large number of foreign policy experts to conclude that caution has transformed into weakness In *The Obama Doctrine* Colin Dueck analyzes and explains what the Obama Doctrine in foreign policy actually is and maps out the competing visions on offer from the Republican Party Dueck a leading scholar of US foreign policy contends it is now becoming clear that Obama s policy of international retrenchment is in large part a function of his emphasis on achieving domestic policy goals There have been some successes in the approach but there have also been costs For instance much of the world no longer trusts the US to exert its will in international politics and America s adversaries overseas have asserted themselves with increasing frequency The Republican Party will target these perceived weaknesses in the 2016 presidential campaign and develop competing counter doctrines in the process Dueck explains that within the Republican Party there are two basic impulses vying with each other neo isolationism and forceful internationalism Dueck subdivides each impulse into the specific agenda of the various factions within the party Tea Party nationalism neoconservatism conservative internationalism and neo isolationism He favors a realistic but forceful US internationalism and sees the willingness to disengage from the world by some elements of the party as dangerous After dissecting the various strands he articulates an agenda of forward leaning American realism that is a policy in which the US engages with the world and is willing to use threats of force for realist ends The Obama Doctrine not only provides a sharp appraisal of foreign policy in the Obama era it lays out an alternative approach to marshaling American power that will help shape the foreign policy debate in the run up to the 2016 elections

Strategy and Strategic Discourse in Turkish Foreign Policy Hasan Yükselen,2020-03-03 This

book provides a critical realist analysis of Turkish foreign policy TFP covering various periods from the Turkish National Struggle to the contemporary Justice and Development Party Government It discusses TFP within the critical realist framework employing the concept of differences in continuity to demonstrate how agency and structure interacted and how some discourses arose and others failed in the history of the Turkish Republic The book also applies the concepts of strategy and strategic discourse to reveal how real world strategic preferences correspond to the narration Lastly the author argues that the underlying structural forces have endured despite Turkey's persistence in enhancing the agency's role ultimately leading to differentiation between what is spoken and what is actualized

The Levelling Michael O'Sullivan,2019-05-28 A brilliant analysis of the transition in world economics finance and power as the era of globalization ends and gives way to new power centers and institutions The world is at a turning point similar to the fall of communism Then many focused on the collapse itself and failed to see that a bigger trend globalization was about to take hold The benefits of globalization through the freer flow of money people ideas and trade have been many But rather than a world that is flat what has emerged is one of jagged peaks and rough deep valleys characterized by wealth inequality indebtedness political recession and imbalances across the world s economies These peaks and valleys are undergoing what Michael O Sullivan calls the levelling a major transition in world economics finance and power What s next is a levelling out of wealth between poor and rich countries of power between nations and regions of political accountability from elites to the people and of institutional power away from central banks and defunct twentieth century institutions such as the WTO and the IMF O Sullivan then moves to ways we can develop new pragmatic solutions to such critical problems as political discontent stunted economic growth the productive functioning of finance and political economic structures that serve broader needs The Levelling comes at a crucial time in the rise and fall of nations It has special importance for the US as its place in the world undergoes radical change the ebbing of influence profound questions over its economic model societal decay and the turmoil of public life

Continental Powers and Naval Development Brian C. Chao,2025-10-16 This book examines how continental great powers have attempted to develop and wield strong navies since 1801 Continental Powers and Naval Development argues that a continental great power s ability to build and effectively use a strong navy is greatly affected by two factors a naval force design capable of executing national strategy strategy coherence and the deployment of that navy to places or for purposes that minimize the dominant naval power s threat perception threat diffusion Each factor is deceptively difficult for a continental great power to achieve but through an analysis of four historical case studies this book shows how both factors are vital not just for successful naval development but for keeping the peace among great powers Finally it highlights how states commonly thought of as unnatural naval powers can nonetheless achieve their political objectives at sea This book will be of much interest to students of naval history maritime strategy and International Relations

China's Geo-Strategy and International Behaviour Col Akshaya Handa,2014-05-01 Geography confers advantages and imposes restrictions on regions Regional powers over the millennia leverage the former and aim to overcome the latter to maximize their gains Such behaviour has been more consistent than political or religious ideologies This can be seen in turmoil in Pakistan despite religious

homogeneity and the failure of the erstwhile USSR China Vietnam axis at the height of Cold War despite similar ideology and structures Likely emergence of China as a global power has placed its neighbours on the horns of dilemma where some portray it as expansionist and hegemonistic power others believe it to be an engine for economic rise The challenge of managing China would require understanding its long term goals and likely means it would employ to achieve them The process initiated by Deng Xiaoping has made China an economic giant which many believe is Communist only in name Even while the Third Plenum of November 2013 seeks to strengthen the process it also has recognized vulnerabilities in society which have the potential of causing internal collapse The book aims to understand China's geographical advantages and restrictions along with its history and economic structure the themes that emerge are important indicators to understand its Geo Strategy China's international behaviour of the last few decades not only validates these but also points to the means that China is employing to achieve its aim Important lessons thus emerge for managing partnership with China

The Making of History M. A. Rabie, 2001-07-29 This book describes the development of human societies over time and identifies the major forces of change that guide history and influence its course The book argues that the course of history has been driven not by leaders states ideas or war but rather by four societal processes whose actions reactions and interactions have governed the nature and pace of historical change These processes are the socio cultural political economic and infomedia processes Three major conceptions of world history the cyclical linear and chaotic have tried to describe the course of history and explain the dynamics of change This book reviews these conceptions and concludes that each one of them is only partially able to provide an understanding of the historical dynamics of change The book incorporates these conceptions into one theory the locomotive theory of history that provides a comprehensive explanation of the movement and dynamics of change throughout history The locomotive theory explains why certain nations have made more progress than others why some people are getting richer while others remain poor and why democracy has succeeded in some countries and failed in others The multiplicity of issues that the book covers makes its analysis and conclusions of particular interest to all people engaged in politics economics socioeconomic development and globalization

Basic Principles of Geopolitics and History Debabrata Sen, 1975

The Ashgate Research Companion to Critical Geopolitics Merje Kuus, 2016-04-01 Since the late 1980s critical geopolitics has gone from being a radical critical perspective on the disciplines of political geography and international relations theory to becoming a recognised area of research in its own right Influenced by poststructuralist concerns with the politics of representation critical geopolitics considers the ways in which the use of particular discourses shape political practices Initially critical geopolitics analysed the practical geopolitical language of the elites and intellectuals of statecraft Subsequent iterations have considered the role that popular representations of the international political world play As

critical geopolitics has become a more established part of political geography it has attracted ever more critique from feminists for its apparent blindness to the embodied effects of geopolitical praxis and from those who have been uncomfortable about its textual focus while others have challenged critical geopolitics to address alternative resistant forms of geopolitical practice Again critical geopolitics has been reworked to incorporate these challenges and the latest iterations have encompassed normative agendas non representational theory emotional geographies and affect It is against the vibrant backdrop of this intellectual development of critical geopolitics as a subdiscipline that this Companion is set Bringing together leading researchers associated with the different forms of critical geopolitics this volume produces an overview of its achievements limitations and areas of new and potential future development The Companion is designed to serve as a key resource for an interdisciplinary group of scholars and practitioners interested in the spatiality of politics
