Janet Frame, 2016-05-01 In 1951 just days before her scheduled lobotomy after years in a mental hospital New Zealand author Janet Frame's first collection of short stories unexpectedly won the Hubert Church Memorial Award one of the country's most prestigious honors. The procedure was cancelled and Frame would go on to become one of the seminal authors of contemporary New Zealand literature. During her time at the MacDowell artist's colony in New Hampshire Frame met painter William Theophilus Brown and their friendship resulted in a whimsical and artistic correspondence that lasted until Frame's death in 2004. In Brown Frame found an ideal listener who inspired her to take the art of letter writing to new creative heights over the course of their correspondence. Frame included character sketches, personal disclosures, invented tales and over 300 of her own doodles and collages. This compilation of letters and original illustrations has been published nowhere else in the world including Frame's home country of New Zealand. This moving and enlightening correspondence opens up the hopes, fears, joys and inner machinations of one of New Zealand's most renowned authors and offers a side of her dramatic personal history often ignored or misunderstood by the public. The closeness and intimacy of the two artists allows for unfettered wordplay where Janet is merely Jay, Bill merely Bee and granular unprocessed creativity is allowed to flow freely. The result is a book that vividly captures the brilliantly unique wit that was Janet Frame. **Brick**, 2002

**Songs of Earth And Power** Greg Bear, 1996-11-15 The Song of Power opened the gateway to the Realm of the Sidhe allowing young Michael Perrin to slip through. Now Michael faces years of captivity and deadly struggles for the future of the Realm and of Earth leading finally to a terrible confrontation on the streets of Los Angeles with the soul of humanity at stake. Weaving the power of music, poetry and myth into a headlong narrative of nearly overwhelming intensity, *Song of Earth and Power* is one of the most original fantasy epics of our time, a vast tapestry of relentless suspense, terrible beauty and brilliant imagination. Originally published years ago in two parts, it now returns in a new edition, rewritten by the author and published in a single volume as he originally intended. Wrote Analog on its original appearance: A delight. A vision of Faery that may owe

**The Nature of Order, Book Four: The Luminous Ground** Christopher Alexander, 2020-03-30 Christopher Alexander's series of ground breaking books including *A Pattern Language* and *The Timeless Way of Building* have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns Now in *The Nature of Order* Alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities The foundations of modern scientific thought are firmly rooted in a conception that the universe is a machinelike entity a play of baubles machines trinkets To this day our real daily experience of ourselves has no clear place in science It is little wonder that a machine like worldview has supported the deadly architecture of the last century This mechanistic thinking and the consequent investment oriented tracts of houses condominiums and offices have dehumanized our cities and our lives How are spirit soul emotion feeling to be introduced into a building or a street or a development project in modern times *The Luminous Ground* the fourth book of *The Nature of Order* contains what is perhaps the deepest revelation in the four volume work Here is a

geometrical view of space and matter seamlessly connected to our own private personal experience as sentient and knowing creatures This is not merely an emotional appendix to the scientific theory of the other books It is at the core of the entire work and is rooted in the fact that our two sides our analytical thinking selves and our vulnerable emotional personalities as human beings are coterminous They must be harnessed at one and the same time if we are ever to really make sense of what is around us and be able to create a living world Alexander breaks away completely from the one sided mechanical model of buildings or neighbourhoods as mere assemblages of technically generated interchangeable parts He shows us conclusively that a spiritual emotional and personal basis must underlie every act of building His buildings and works of art demonstrate in detail what he means And then in the middle of the book comes the linchpin of the work a one hundred page chapter on colour which lavishly illustrates and dramatically conveys the way that consciousness and spirit can make their appearance in the world Altogether present throughout this fourth and final book is a new cosmology uniting matter and consciousness consciousness inextricably joined to the substrate of matter present in all matter and providing all wholeness with its material cognitive and spiritual underpinnings This view though radical conforms to our most ordinary daily intuitions It may provide a path for those contemporary scientists who are beginning to see consciousness as the underpinning of all matter and thus as a proper object of scientific study Taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart A step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united The Nature of Order constitutes the backbone of Building Beauty Ecologic Design Construction Process an initiative aimed at radically reforming architecture education with the emphasis of making as a way to access a transformative vision of the world The 15 fundamental properties of life guide our work and have given us much more than a set of solutions The Nature of Order has given us the framework in which we can search and build up our own solutions In order to be authentically sustainable buildings and places have to be cared for and loved over generations Beautiful buildings and places are more likely to be loved and they become more beautiful and loved through the attention given to them over time Beauty is therefore not a luxury or an option it includes and transcends technological innovation and is a necessary requirement for a truly sustainable culture

Gompertz, 2012-10-25 For skeptics, art lovers and the millions of us who visit art galleries every year and are confused, *What Are You Looking At?* by former director of London's Tate Gallery Will Gompertz is a wonderfully lively, accessible narrative history of Modern Art from Impressionism to the present day. What is modern art? Who started it? Why do we either love it or loathe it? And why is it such big money? Join BBC Arts Editor Will Gompertz on a dazzling tour that will change the way you look at modern art forever. From Monet's water lilies to Van Gogh's sunflowers, from Warhol's soup cans to Hirst's pickled shark, hear the stories behind the masterpieces, meet the artists as they really were and discover the real point of modern art. You will learn not all conceptual art is bollocks, Picasso is king but Cézanne is better, Pollock is no drip, Dali painted with his moustache, a urinal changed the course of art, why your 5-year-old really couldn't do it. Refreshing, irreverent and always straightforward, *What Are You Looking At?* cuts through the pretentious art speak and asks all the basic questions that you were too afraid to ask. Your next trip to the art gallery is going to be a little less intimidating and a lot more interesting. With his offbeat humor, down-to-earth storytelling and flair for odd details that spark insights, Will Gompertz is the perfect tour guide for modern art. His book doesn't tell us if a work of art is good; it gives us the knowledge to decide for ourselves.
